SATISFACTION GUARANTEED

If for any reason you don't like or don't want something you received from Tower hobbies, you may return new and unused merchandise within 10 days for a full refund or exchange.

Availability, specifications and prices are subject to change.

Tower Hobbies maintains no responsibility for inadvertent errors in this Tower Talk.

Dear Tower Customers,

This spring promises to be a great one for R/C. A wide variety of innovative new products have hit the market, more R/C channels are now available (thanks to the AMA) and Tower's famous, super-low pricing makes all of it very easy to afford.

The **Great Planes P-51 Mustang** (page 7) promises to become an all-time favorite in stand-off, or "fun" scale sport planes. Now you can finally buy a super high-quality sport scale P-51 that builds as well as it flies. Another new aircraft entry, the **Flitecraft Minute Man .40**, (page 15) is an extremely durable ARF trainer that is about as crash-resistant as they come. The good folks at Flitecraft have been making "hard-to-break" airplanes for a long time and this new kit is their hardest ever. Truck lovers will fall head-over-heels for Kyosho's new **Outlaw Rampage**—a .12-sized, gas-powered truck based on the very successful Rampage chassis. Tweaked for truckin' the newest Outlaw features a Ford pick-up body and other new features. See page 53 for more.

We hope you enjoy this issue of Tower Talk as much as we enjoyed putting it together! Give us a browse, then give us a ring with your springtime order—we're just a toll-free call away!

Kevin Hisel
Dir. of Sales/Marketing

UPS Greatly Increases Rates — Tower Holds The Line

Just before we went to press, we received a shocking letter from UPS informing us that, "On February 18, 1991 . . . rates for shipments to residential locations will increase by 16.1%. . . ." We feel that this hike is inordinately excessive, but after considerable thought have decided to "hold the line" on our own normal \$5.25 shipping and handling charge for the time being.

One way you can help us to "hold the line" — and actually receive better service from UPS — is to have your orders sent to your "work" address. The UPS rate hike for packages shipped to businesses was not as great as their residential increase. UPS representatives also tell us that in general, business packages are delivered sooner than those going to home addresses. By shipping to your work, you also avoid the package being left outside of your home if no one is there. Remember, we keep both a mailing address and a shipping address on file for you, so your Tower Talks and catalogs can still be sent to your home. So, next time you order, just tell our Sales Representative, "Ship it to my work!" and we'll do the rest. Thanks!

Tower Hobbies' 1991 Catalog!

The Annual Tower Hobbies Catalog:

R/C Report calls it, "The singular best value in R/C today." Modelers everywhere refer to it as the "R/C bible." In addition to hundreds of new R/C products, the new 1991 Tower Catalog, includes reference material plus descriptions for over 10,000 R/C airplanes, cars, boats, radios, engines and other accessories, and one thing we know you'll love . . . lower prices! Despite rising costs, we've actually lowered our catalog pricing on hundreds of the most popular R/C products.

If you have ordered from Tower in the last 18 months, you should have received your own copy absolutely FREE! If you would like to order a catalog, we still charge only \$3.00. No modeler should ever be without the Tower Hobbies 1991 Catalog!

O.S. engines give you high-performance, gas powered flight with the PT-20 or PT-40!

Highest quality materials & workmanship in every Great Planes Kit.

"Thrustmaster" 550-size electric motor power the PT-E, no fuss, no noise.

Our best-selling wooden kit—that anyone can build and fly!

Staggering — how else can we describe the number of "top gun" R/C pilots who first sprouted wings flying Great Planes PT-20 and PT-40 trainers? Great Planes' PTs make flying fun, fast, and easy. They're easy to put up and hard to put down.

So even if you have no experience flying R/C, you can still learn to fly R/C quickly with a PT as your flight instructor. No other wood kit builds as easily. All parts are machine-cut and sanded or razor cut. They interlock perfectly for a solid build. Detailed instructions guide you through every stage of construction, including radio and engine installation.

Soon you're in the air discovering just how smooth and steady R/C flight can be. Afraid of losing control? Just let go of the sticks. Your trainer will recover on its own! Before long, those early-flight gastronomical butterflies will be scrambling for cover as you send your PT-20 or PT-40, on a 4th channel through loops, rolls, and spins!

The Great Planes PT-E is a totally unique airplane that was designed to retain all of the great building and flying qualities of the PT-20 and PT-40, but adds a special twist never available to beginners before: electric power.

"Thanks for a great (PT-40) kit. Are all Great Planes kits this good? If so, I look forward to building more."

— David Statler, Imboden, AZ

Requires:
Radio: 3-Channel
6-Cell Battery & Charger

Electrics have dramatically risen in popularity because they're clean, quiet, and convenient. Those are three very good reasons for building an electric trainer - no mess, no fuss, no noise. You can concentrate on more important things, like learning to fly.

Performance, however, doesn't suffer. Great Planes includes the popular "Thrustmaster" 550-size electric motor, a switch harness, propeller, and spinner as standard equipment. The package guarantees you easy takeoffs and at least 5 to 7 minutes of exciting flight.

All three Great Planes trainers are sure to take you confidently into the air. And right now, you can save on clean, quiet electric flight with the PT-Electric combo, which includes the kit, battery, and a Kyosho Multi-Charger II. Save again with the Milt's "How To..." video tape... 85 minutes of valuable tips and information that no new pilot should be without!

Airplane Kits

If you're ordering an airplane, ask about our completion package—all the accessories you'll need to complete your kit!

Super Decathlon 40

Airshow realism with Great Planes performance.

74⁹⁹

Experience the thrills of a scale aerobatic airshow with the **Great Planes Super Decathlon 40**—an easy-building sport scale kit with the same classic lines as the full-size aircraft.

The **Super Decathlon 40** was computer-designed for easy assembly and outstanding performance. Detailed, photo-illustrated instructions, rolled plans and Great Planes' traditional quality combine to make building a pleasure. The kit features interlocking construction, top quality balsa and plywood parts, pre-shaped and notched wing leading and trailing edges and aluminum main gear. A molded ABS cowl and wheel pants, plus molded clear plastic windshield and side windows, add sharp detailed looks to this outstanding performer. Add sharp savings to the package, with the Super Decathlon 40/O.S. FS-70 Surpass combo!

SUPER SPORTSTERS™

• Five great-flying, great-looking planes to choose from!

Great Planes Super Sportsters are top-performing sport planes that help you progress from workshop to stable flight to aerobatic maneuvers in record time. All include tricycle and taildragger gear, motor mount, extensive hardware, plans, and photo-illustrated instructions. The 48" span **Super Sportster 20** requires a .19-.25 2-cycle or .30-sized 4-cycle engine. The **Super Sportster 40** requires a .35-.45 2-cycle or .40-.60 4-cycle engine, and spans 56". The Super Sportster 60 spans 61" requires a .45-.61 2-cycle or .60-.90 4-cycle engine. Spanning 72", the large-scale **Super Sportster 90-120** needs a .61-.91 2-cycle or .90-1.20 4-cycle engine. The **Sportster Biplane 40** has a wingspan of 45", and requires a .35-.45 2-cycle or .60 4-cycle engine. All require a 4-channel radio.

TRAINER SERIES

• Easy assembly and superior flying characteristics.

Great Planes Trainers are easy to build, fun to fly, and perfect for both beginners and pros.

Semi-symmetrical airfoils mean you can perform inverted flight, loops, and other aerobatic maneuvers once you get the feel for the controls. The design also provides good wind penetration, without the ballooning effect common with flat-bottomed airfoils. Premium-quality balsa parts, detailed, photo-illustrated instructions, an extensive hardware package, and sturdy landing gear

are included. Wings can be attached with nylon wingbolts (included) or with rubber bands. Each requires an engine and a 4-channel radio. Trainer combos are available with perfectly-matched O.S. engines at special prices.

Tower Hobbies Is Open For Business 365 Day a Year!

FREE 1 ounce bottle of Bullet Glue with any airplane kit ordered from this Tower Talk.

Airplane Kits

With the Great Planes Ultra Sport 40 and new Ultra Sport 60, your flying skills will expand faster than ever before.

Sophisticated design features — correct wing and power loadings, correct moments and symmetrical airfoils for smooth wind penetration — will enable you to perform the most advanced maneuvers with startling precision, and still enjoy very stable, low speed landings.

Kit quality matches performance in excellence, featuring aircraft-quality wood and an interlocking parts design for accurate alignment. Extensive hardware, computer-generated rolled plans and photo-illustrated instructions are also included.

The 55" Ultra Sport 40 requires a 2-cycle .40-.45 or 4-cycle .60-.70 engine; the 62" span Ultra Sport 60 requires a 2-cycle .60-.65 or 4-cycle .65-.71 engine. Both require a 4-5 channel radio.

NEW!

Now sport fliers can enjoy the authentic thrills of flying a World War II fighter plane. The new Great Planes P-51D Mustang combines the full aerobatic potential of a sport flier with the realistic scale looks of a famous military fighter. Based on the proven airfoil of the Ultra Sport 40, the P-51D offers the same correct wing and power loadings for great low-speed stability and smooth landings.

Unlike precision scale models, the P-51D looks great without being highly complex. It features gun turrets, exhaust stacks and optional retractable landing gear. It also includes a detailed, computer-generated instruction book, and Great Planes quality interlocking construction.

Stock #TC1038 • Retail Price \$109.95 • Now Only **\$74.99**

CoroStar 40

U.S. AirCore CoroStar 40 and .40 Family Trainer literally bounce back from crashes! Tough, light, and 100% fuelproof, ultra-resilient AirCore™ corrugated polypropylene material comes precision die-cut and scored for fast, easy "Fold & Fly" assembly. Unique Power Cartridge for on-board gear slides into nose in minutes, so same gear can be used in several models. 56" span CoroStar 40 low-wing performs stunning aerobatics; beginner's 64" span AirCore 40 Family comes pre-decorated, and offers stable flight, high-lift wing, and two unique manufacturer guarantees. Both require 4-channel radio and a .40-.45 2-cycle or .50 4-cycle engine. For more on the CoroStar 40, see page 124 of our '91 Catalog!

Goldberg is dedicated to quality in all phases of kit production. The 56" span **Falcon 56 MKII** comes with ailerons and requires a .19-.40 engine and 3- or 4-channel radio. The gentle, 50" span **Eagle 2** requires an .09-.25 engine and a 2, 3, or 4-channel radio. The 54" span **Mirage 550** lets beginners fly with electric power. It requires a 2-3 channel radio, battery, and charger. The **Freedom 20** is a 55½" span sport/trainer that's easy to build and fly. It requires a .20-.25 2-cycle or .20-.26 4-cycle engine and a 4-channel radio. The stable, 63" span **Eagle 2** takes a .29-.45 engine and a 3-4 channel radio. The **Senior Falcon** trainer spans 69" and requires a 4-channel radio and .35-.60 engine. The **Jr. Tiger** spans 50" and requires a .15-.30 engine and 4-channel radio. The 63" span **Sky Tiger** and 64" span **Super Chipmunk** are ideal first low wing sport planes. The Sky Tiger takes a .40-.61 engine

and requires a 4-channel radio. Super Chipmunk requires a 2-cycle .45-.60 or 4-cycle .60-.90 engine and a 4-6 channel radio. Low-speed landings and thrilling aerobatics meet in the 54" span **Ultimate Biplane**, which requires a .60 2-cycle or .90-1.2 4-cycle engine and a 4-channel radio. With a 76½" span, the **Piper J-3 Cub** has a wide range of performance possibilities. Required are a 2-cycle .40-.61 or 4-cycle .40-.90 engine and a 4-channel radio. An optional **float kit** is also available for the J-3 Cub. The 78" span **Electra Deluxe** comes with 550 motor, prop, switch harness, and spinner. A 2-3 channel radio, 6-cell battery with Tamiya connector, and charger are required.

ZINGER WOOD PROPELLERS

Test-proven for high RPM, and balanced twice before shipping, Zinger wood props offer modellers top-quality value and performance. All Zinger props have true pitch with airfoil cross section all the way to the tip of the blade. Zinger props are available in a wide range of sizes and pitches, designed and engineered for maximum thrust and efficiency in any flying application. For additional listings, see page 277 of our '91 Tower Catalog.

DU-BRO TRU-SPIN PROP BALANCER

- Balances props of any size.

Completely adjustable to balance with virtually any size propeller. Unique over/under set-up option accommodates even large-scale props. Precision-machine rotating wheels assure a perfect balance with ease.

Retail	\$26.95	Now Only	\$18.99
TC1916			

PROPELLERS

- Thinner, computer-designed blades produce more thrust with less noise.
- Proven performance for Sunday fly-ins or pattern contests.

Give your favorite model more sky-grabbin' "bite" with these innovative nylon props. APC propellers feature computer-designed blades with constant true pitch to provide greater thrust with reduced noise. Props are made of injection-molded nylon, reinforced with strands of fiber running the length of the blade; as a result, blades present a thinner profile, yet have superior strength. Available for sport or competition use in sizes from 9" to 14.0". See line listings below.

Almost-Ready-To-Fly Airplanes

If you're ordering an airplane, ask about our completion package—all the accessories you'll need to complete your kit!

Cherokee-25

Wingspan: 52"
Wing area: 456.7 sq. in.
Weight: 3.75 - 4.25 lbs.
Requires:
Engine: 2-cycle .25-.40
or 4-cycle .40-.46
Radio: 4-channel

Cessna-182

Wingspan: 61 1/2"
Wing area: 615 sq. in.
Weight: 6.5-7.5 lbs.
Requires:
Engine: 2-cycle .40-.46
or 4-cycle .60
Radio: 4-channel

Diabolo-40

Wingspan: 55 3/4"
Wing area: 543 sq. in.
Weight: 5.5-6.5 lbs.
Requires:
Engine: 2-cycle .40-.46
or 4-cycle .60-.70
Radio: 4-channel

Telstar-25

Wingspan: 50"
Wing area: 443.5 sq. in.
Weight: 4.25 - 4.75 lbs.
Requires:
Engine: 2-cycle .25-.40
or 4-cycle .40
Radio: 4-5 channel

Super Chipmunk-25

Wingspan: 51 1/2"
Wing area: 425 sq. in.
Weight: 4.25-4.75 lbs.
Requires:
Engine: 2-cycle .25-.40
or 4-cycle .40-.48
Radio: 4-channel

HOBIBICO® High Quality ASAP'S

Extra 300

Wingspan: 55-3/4"
Wing area: 543 sq. in.
Weight: 5.5 - 6.5 lbs.

Requires:
Engine: 2-cycle .40-.46
or 4-cycle .61-.70
Radio: 4-channel

Spend less time building, more time flying with Hobbico ASAPs. No building, sanding, or painting is needed: assembly is fast, fun, and easy! ASAPs' balsa/ply structure is already covered with a brilliant, durable 3-layered covering. Complete instructions, plus spinner, fuel tank, wheels, push rods, and hardware are included.

In just hours you can complete the aerobatic **Cherokee 25** or easy-flying **Cessna 182** with wheel pants—both perfect for intermediate fliers. Experienced pilots will find FAI-style maneuvers a snap behind the sticks of the **Telstar** or **Super Chipmunk** models. The semi-scale **Diabolo 40** is also fully aerobatic and includes wheel pants. The **Extra 300** recreates the West German design with many impressive details—even simulated rivets! It's an advanced flier's dream.

For an ARF you'll be proud to own and thrilled to fly, choose an ASAP!

KYOSHO®

Cessna Cardinal™

Looks Great! Flies Great!

At 1/9 scale, the 47" span **Cessna Cardinal** practically flies out of the box with authentic detail. It takes just a few hours to assemble, is virtually impossible to stall, and is lightweight and crash resistant. The wing is easily removed for convenient transport. An easy-access battery hatch allows speedy pack exchanges for almost non-stop flying.

A LeMans Stock 05 motor with matched Kyosho SuperProp gives you power for off-the-ground takeoffs. In the air, the Cardinal provides smooth, stable performance. The aerobatic potential of this graceful model will also satisfy advanced pilots wishing to fly an electric.

Included is linkage hardware, decals, and epoxy. Add an electronic speed control or Kyosho's Auto Cut-Off Relay unit, a 2-3 channel radio, 6-cell Sprint SCR battery and charger, and you're ready for realistic, fun-filled flight.

And with our Cardinal Combos, you can enjoy flying for less. Save with the Standard combo (which includes the kit, an Impulse II 2-channel radio, 6-cell Sprint SCR battery, and Kyosho DC Multi-Charger II)...go all out with the Cardinal Ultimate Combo, which includes everything in

The Best-Flying ARF Electric Made!

Almost-Ready-To-Fly Airplanes

Curtiss P-40E WARHAWK

Curtiss P-40E Warhawk

Wingspan: 61"

Wing area: 605 sq. in.

Weight: 6.25-7 lbs.

Requires:

Engine: 2-cycle .46-.61 or 4-cycle .70-.91

Radio: 4- or 5-channel

The Hobbico ASAP line is the **ONLY** place you'll find a scale ARF of the dramatic **Curtiss P-40E Warhawk**.

The shark-mouthed P-40 performed heroically on every front during WWII, when General Claire Chennault's daredevil Flying Tigers flew their P-40s with the Chinese air force against Japanese bombers. The Flying Tigers' exploits lifted Allied spirits then, and their aircraft continues to inspire new generations of flying aces...R/C pilots included.

Hobbico's P-40 has been scaled from a full-size Warhawk hangared at Frasca Field in Urbana, IL. Details include airbrush-simulated ribbing and fully-enclosed engine cowlings. Advanced fliers will also appreciate the P-40's superb flight performance, from its magnificent low speed characteristics to high-speed passes that send time spinning back 50 years.

The Curtiss P-40E Warhawk features the same high-quality construction found in all Hobbico ASAPs. Available separately from Hobbico are 90° rotating retracts designed especially for the P-40. They're easy to install as fifth channel and add to the model's exciting realism.

Stock#	Description	Retail	Now

TC3208	Mechanical Retracts 90° Rotating . . .	44.95	29.99

Hobbico's ASAP is scaled after a full-size P-40 for uncompromising accuracy.

The P-40E ASAP arrives 80% pre-built for fast assembly.

Add Hobbico Custom 90° Rotating Retracts for extra realism!

Hobbico® Sturdy Birdy™

With a wing nearly 20% larger than its competitor, it's no wonder that the 53" span **Sturdy Birdy** flies more smoothly. And considering its construction, the reason for its name is obvious. The rugged aluminum tail boom and molded foam wing were designed to take abuse. But, combined with pre-cut tail feathers, they cut assembly time, too.

The Sturdy Birdy takes off from the ground easily or can be handlaunched with a gentle toss. Its self-recovering flying attitude keeps you in control throughout your early flights. Extra-tall landing gear absorbs shocks and prevents prop breakage during landings.

Ailerons on the **Sturdy Birdy II** offer you greater control at only small increase in cost and assembly time. Like the Sturdy Birdy, the Sturdy Birdy II includes extensive hardware and a complete, easy-to-follow instruction sheet.

Dollar for dollar, Sturdy Birdy kits are your best value. Required are a .20-.25 size engine and a 4-channel radio with three servos (four required for Sturdy Birdy II). Get off to a good start in flying (and saving) with Sturdy Birdy Combos!

HOBBICO® AWARE

The Hobbico AWARE story

Hobbico AWAREs (All-Wood, Almost-Ready-To-Fly) arrive 80% complete, with all major assemblies pre-built of selected, top quality woods, and precovered with a smooth, professionally-applied polyester skin. Virtually all necessary hardware is included. Easy-to-follow instructions guide you through the final few steps of assembly — and to some of the best-performing kits around.

The 64" span Hobbico Flightstar 40 is the ideal all-wood trainer, with a flat-bottom airfoil that gives the novice flier reassuring stability and increased confidence with each successful flight. All-wood construction makes it durable and easily repairable in case of mishaps. The 60" span Hobbico Avistar 40 is an intermediate pilot's dream. Its semi-symmetrical airfoil offers smooth, predictable flight and aerobatic potential as flying skills grow. Intermediates eager for a .60-size trainer with aerobatic potential can find it in the 71" span Hobbico Hobbistar 60 — a high-wing beauty that flies as easily as it builds. But no matter which one you choose, you're a sure winner with the quality, convenience, and top performance of the Hobbico AWARE series...from Tower!

Almost-Ready-To-Fly Airplanes

**Great quality ARFs
at affordable prices!**

- Durable, inexpensive, and gentle for the beginner.
- A fun flier with quickness and agility.
- Snappy, sporty aerobatics for intermediate pilots.

Flitecraft ARFs are durable, easy to assemble, and affordable, and feature fuselages which endure the roughest landings. Wings have foam cores, covered with an impregnated, laminated board. Ailerons are already attached in the **Cardinal III**, **Arrow III**, **Shadow**, and new **Minuteman .40**. A generous accessory package is included with each.

Flitecraft's new Minuteman .40: a durable trainer with great looks and great performance.

When it comes to durability and affordability, the Minuteman .40 trainer is the ideal durable trainer for first-time fliers. If you've got four to six hours, you've got the time needed to build the Minuteman .40. In addition to being easy to build, the Minuteman .40 is also easy to fly and quick to repair, because it's built to withstand the abuse a beginning pilot can give.

New, budget-minded fliers will appreciate the strength of the Minuteman .40's 56" span, pre-covered foam core wing and PVC tail boom. They offer smooth flight characteristics and make workbench repairs fast and simple. The Minuteman .40 also includes a real engine mount and firewall, extra-durable fuselage, show-stopping trim, and extensive accessory package. The fuselage fully encloses the engine for a streamlined appearance found in no other durable-type trainer. Ailerons are installed to give this 4-channel plane aerobatic potential no 3-channel trainer can offer.

Flitecraft's full line includes the best features and prices for every flier.

The .40-size **Shadow** is a low-wing, tail-dragger sport and competition model that features a fully-symmetrical tapered wing and wheel pants.

The **Solo III**, **Cardinal III**, and **Arrow III** are all sturdier, easier to build, and better-looking than ever! Features include increased wing area and thickness, longer nose and tail moment (each is 2" longer), new graphics, unique bolt-on wings, one-piece cowlless fuselage, super-quality rugged decals, trim, new packaging, and more. The 57" span **Solo III's** gentle flight characteristics and durability make learning to fly easy. For intermediate fliers, the 58" span **Cardinal III's** quick response and agile flight habits make it perfect for fun flying. The snappy, sporty, aerobatic, 55" span **Arrow III** shows exciting performance for intermediate to more advanced fliers.

The **Shuttle** is a pre-built, lightweight carrier for any flier. Foam-padded grooves securely cradle wings and fuselage without damage. Molded in a neutral dark gray, it can be painted to match your plane.

If you're ordering an airplane, ask about our completion package—all the accessories you'll need to complete your kit!

O.S. RYAN ARF

With the 58" span O.S. Ryan ARF, there's no sanding, painting, or covering required: its authentic colors and trim have been captured in a special four-layered covering which gives its built-up balsa wing and fuselage a strong, tight, and fuel-resistant finish. Powered by the included O.S. .40 FP engine, the Ryan's low-wing design is smooth and steady, yet provides practiced fliers with the opportunity to perform truly outstanding aerobatics. Requires a 4-channel radio.

Stock# TC1160 • Retail Price \$399.95 • Now Only **\$229.99**

O.S. MAX LAZER ARF

• Easily performs all standard aerobatic maneuvers.

With its factory-installed O.S. .25 SF and symmetrical airfoil, the 47 5/8" span Max Lazer ARF is a fast, light, and highly-aerobatic craft! Its ARF construction features include a colorful four-layer foam-and-film covering over the balsa and ply framework, plus a bolt-on wing for easy transport. Add a 4-channel radio and a few evenings work, and you're ready to take center stage at the field! See page 10 of our '91 Catalog for more!

Stock# TC1161 • Retail Price \$349.95 • Now Only **\$224.99**

AIR KRAFT TEXAS OUTLAW

• National Champ comes with "Speed Secrets" hop-up sheet!

This winning, 50" span Quickie 500 racer comes complete with a "Speed Secrets" hop-up sheet for competitive racing...and it's available only from Tower! Blazingly fast in the air, this all-balsa ARF also comes ready for speedy assembly, with a pre-built fuse and pre-sheeted balsa wings and stab, aileron hook-ups, landing gear and more. Add a 4-channel radio and a hot .40 engine, and you're ready to hit the Outlaw trail to victory.

Duracraft ARF AIRPLANES

Dura-Bat

Dura-Plane II

Dura-Trainer .40

A bend-resistant internal aluminum wing spar added to the Dura-Plane II's design make the 45" span **Dura-Trainer** the most indestructible Dura-Plane yet! Also featured are ailerons, longer nose and tail moments, for smoother, more positive control, plus motor mount, landing gear, wheels, and hardware. Required are a 4-channel radio and .40 engine.

Flight-ready in just 6-10 hours, the 45"-span **Dura-Plane II** and **Dura-Plane II w/Dura-Hide Wing** feature a super-strong PVC fuselage, foam wing, balsa tail, and aluminum main channel. Designed for durability and entry-level economy, these tough trainers require all accessories, a 2-cycle .20-.40 size engine and a 3-4 channel radio.

Experienced fliers can now perform all basic aerobatic maneuvers without crash worry. The 45"-span **Dura-Bat** features an enclosed PVC fuselage and aluminum main channel for increased aerodynamics. Like the Dura-Bat, the **Dura-Bat w/Dura-Hide Wing** requires a .40-.46 engine, all accessories, and a 4-channel radio.

See just how indestructible Duracraft's Dura-Plane is in "Dura-Plane: The Movie", as a model survives crashes with poles, fences and cars, a mid-air collision with another craft...and even a shotgun blast!

TOP FLITE HEADMASTER

Top Flite's 59 1/2" span **Headmaster** ARF trainer comes with parts ready for quick assembly. An extensive hardware package is supplied. This Ken Willard design requires a 4-channel radio and a 2-cycle .40-.46 engine. See our '91 Catalog, page 123.

Retail **\$199.98** Now Only **\$99.99**

The Entry-Level Sailplane That's Already A Proven Winner!

• Winner of 1990 AMA Nats!

The Great Planes Spirit, piloted by Paul Carlson, captured 1st place in the 2-meter class at the 1990 AMA Nats! Easy to assemble and very durable, this contest winner is the perfect sailplane for any skill level.

The Spirit is designed around a 2-meter wing featuring a triple-taper platform, polyhedral shape, and low wing loading, and is an excellent thermal chaser. It's easy to build, even for the beginner, with top-quality, machine-cut balsa parts and classic Great Planes detailed plans and instructions to guide you through every step of assembly. Hardware, canopy, and molded cockpit are also included.

Wing span: 78.5"
Wing area: 676 sq. in.
Weight: 30 oz.
Wing loading: 6.4 oz.
Requires: 2- or 3-channel radio

TC1987	Great Planes Spirit 2-Meter Sailplane . .	49.95	34.99

No matter what your experience, you'll soar like a pro with a little help from Great Planes.

Wingspan: 75.25"
Wing area: 3.54 sq. ft.
Weight: 49.8 oz. (w/ Radio & 7C Batt. 49.8 oz.)
Soarus II includes ailerons for precise maneuvers.

Wingspan: 70"
Wing area: 3.15 sq. ft.
Weight: 43 oz. (w/ Radio & 7C Batt. 43 oz.)

The Kyosho Soarus ARF electric sailplane is 90% preassembled, and includes an efficient direct-drive system with LeMans AP36L motor and spinner-equipped folding propeller. The durable, blow-molded fuselage easily accepts 6- or 7-cell battery packs. Like the beautifully hand-crafted, pre-covered balsa wing and tail, the fuselage is finished in a high-visibility yellow. Its design includes a superb power-to-weight ratio for outstanding climb-outs, and a modified Selig 3021 airfoil for superior thermaling ability. The Soarus II adds ailerons for enhanced thermal turn capabilities--and even greater contest-winning performance.

KYOSHO STRATUS 2000™

High-Quality ARF Electric For Any Skill Level

Length: 34.8"
Wingspan: 76.4"
Weight: 44.1 oz.
Motor: 540-size (included)

- 90% Pre-Built ARF
- State-of-the-Art Design

Requires:
3-Channel Radio
7-Cell & 4V Battery & Charger

Wing Construction

Kyosho's 76.4" span Stratus 2000 blends the most successful European trends with state-of-the-art, proven design features to provide both new and experienced sailplane enthusiasts with a model capable of powerful climb outs and smooth transitions to gliding.

Among these features are Schuman-type wingtips and the S-3021 airfoil; a direct-drive system powered by the included 540-size motor; and a scimitar-shaped folding propeller that contributes to the Stratus 2000's overall low-drag design. Largely pre-built, the Stratus arrives with a durable, blow-molded, polypropylene fuselage, plus pre-built wing and tail sections beautifully pre-covered with Excelcote film. The three-piece main wing attaches quickly and can also be easily disassembled for convenient transportation.

For beginners or practiced sailplane fliers, the Stratus 2000 offers proven high-performance. Required are a 3-channel radio, 7-cell battery, and charger. Soar into savings with the combo!

AIRTRONICS LEGEND

The F3B-influenced Legend features a Selig 3021 airfoil, 113" wingspan and 1050 sq. in. wing area. Wings are built-up spruce and balsa; fiberglass fuse is Kevlar-reinforced. Requires a 4-channel radio.

Retail \$299.95 Now Only **\$199.99**

FUTURE FLIGHT KLINGBERG WING

- Unique flying wing!

Light wing loading and low drag give the 78" span Klingberg Wing marvelous flying abilities, and its unique body style is sure to be talked about at your flying field. Made of pre-cut balsa and plywood parts. A wing jig is included to simplify building. A mechanical mixer which controls the elevator functions allows you to fly with a 2-channel radio and standard servos. 2-channel radio is required. Instructions and materials for an optional power pod are also included. See our '91 Catalog, page 127, for more information.

Stock# TC1982 • Retail Price \$59.95 • Now Only **\$39.99**

COX EAGLE II

- All-foam sailplane builds fast, flies great.

The 55" span Eagle II ARF offers novice pilots a complete, easy-building sailplane package for an economical price. Durable, polystyrene foam wing simply rubber-bands on to fuselage; receiver included. Single-channel radio is factory-installed. Computer-designed for aerodynamic stability and top overall performance, the Eagle II ARF includes a hi-start for exciting high-altitude launches. Requires 12 "AA" batteries for transmitter.

Stock# TC1979 • Retail Price \$139.95 • Now Only **\$59.99**

GM PRECISION THERMAL CHARGER

Lightweight, balsa construction and a powerful motor package keep the 60" span Thermal Charger flying high when thermals fail. Spruce wing spars and all-balsa construction trim weight and add strength; included Leisure 05 motor, prop, and switch harness (with on/off micro-switch and arming switch) extend flight times to 10-12 minutes. Requires a 2-channel radio, battery, and V-tail mixer.

Stock# TC1986 • Retail Price \$69.95 • Now Only **\$46.99**

ACE EASY EAGLE 2-METER SAILPLANE

The 2-meter Easy Eagle sailplane features flaps, balsa construction, and a computer-generated, SD-7032 airfoil for easy launches and outstanding thermal soaring. Bolt-on wing makes storage and transport convenient and easy; extensive hardware included. Actual wingspan: 78 1/2". Requires 3-channel radio. New to sailplanes? See "Introduction to Sailplanes" on page 125 of our '91 Catalog!

KYOSHO® EP CONCEPT™ The first electric helicopter from a name you know and trust.

Length: 31.9"
Rotor Diameter: 35.9"
Height: 8.3"
Width: 3.5"
Weight: 2.6 lbs.
Motor: LeMans AP 36 (Included)
Requires:
Radio: Helicopter radio, 4 mini servos,
electronic speed controller,
gyro, 8.4V battery & charger

Toughest construction of
an electric heli on the market!

Motor and drive gear already mounted
for quick, easy assembly.

Kyosho uses the latest in technology to bring electric power to helicopter flight with the EP Concept. Thoroughly researched and tested by Kyosho's expert design team, the EP Concept is the most advanced, best-flying electric-powered helicopter we've seen. It's backed by Kyosho's proven experience in the helicopter industry, extensive knowledge in material design and complete parts support.

Truly an amazing aircraft, the EP Concept features a belt-driven tail that is exceptionally lightweight and very smooth. Collective pitch gives it accurate and quick response. A metal flapping hinge system allows for simplicity, lightness, and stiffness in the rotor head. The EP Concept

gains precision from a swash plate with metal pivot balls. Pitch rod ball links may be adjusted by half turns for more precise blade tracking.

In addition to these features, the EP Concept is exceptionally durable. Its strong main structure enables it to withstand abuse pilots can give their models. The EP Concept also includes 20 ball bearings for low friction, a one-way bearing in its main gear for autorotations, an enclosed gear train to keep dirt out, foam blades for smooth maneuvers and hovering stability and direct servo linkages to controls for less free play and more accuracy.

• Call the Kyosho Helicopter Hotline, (217) 398-2834,
for expert help with your Concept 30 questions!

The Concept 30 DX broke new ground in
.30-size helicopters, offering novice fliers an
easier way to learn piloting skills. The Concept
30 SE, with nylon stabilizer paddles and ball-
bearing efficiency, provided experienced pilots
with enhanced aerobatic capabilities.

Now, Kyosho offers the master pilot unparal-
leled .30-size performance, with the new
Concept 30 SX. New design and engineering
modifications give the Concept 30 SX the ulti-
mate in precision response and control. Expert
fliers can now push their skills to the upper limits
with confidence, and perform difficult maneuvers
closer to the deck than ever before.

The Concept 30 SX comes with a sleek new
canopy design, but can also accept any of the
scale fuselages designed by Kyosho. The **Jet
Ranger** and **Hughes 500** bodies require a
starter extension shaft, available separately. Kyosho
also offers a scale **Hughes 300** fuselage and
Milt's Helicopter Video — a great tool for the
helicopter novice. For more on Concept 30
Helicopters, see pages 24-25 in the 1990 Tower
Catalog, or pages 20-21 in the all-new 1991
Tower Catalog!

Last Chance!

All Phone Specials Good
April 19-30.

If you missed them the first time around, it's not too late to take advantage of Tower's spectacular Phone Specials. With Spring just outside the window, now is the time to get your boat, plane, car, or truck in shape for a Spring fling or Summer full of Fun!

Guaranteed by Tower If you're not totally satisfied with Tower Power Fuel, simply return any unopened gallons and we'll immediately refund the purchase price of the fuel returned. Don't settle for less than the best — Tower Power Fuel! Available in 4 gallon cases.

TOWER POWER FUEL MODEL ENGINE FUEL

0% Perfect for a wide range of performance applications, Tower Power 0% Premium Fuel provides excellent results for trainers through FAI competitors!

5% & 10% For the weekend or sport flier. 5% and 10% nitromethane blends provide great performance at an economical price.

Premium:

Tower Power Premium Fuel gets top performance from all types of engines. In many cases, using Tower Power Premium results in a 10-15% increase in engine power output!

Sport:

Available in the top three nitro blends, Tower Power Sport Fuel provides excellent performance and protection — at a very economical price.

15%&25% The higher the percentage of nitromethane, the more power your model will receive. Clean burning for the high performance needed in pattern and racing competition.

40% Fill your tank with 40% Hi-Nitro Premium when the utmost in power is demanded for your model. For the best results, this is the fuel to race with.

4-Cycle Specially formulated to make your 4-cycle engine run better and longer, with a 15% nitro blend and more castor oil.

Helicopter Fuel Tower's 12% and 15% nitromethanes blend in 100% synthetic oil for a helicopter's power needs. New 30%, created specifically for ultra-high performance helis, features special lubricants for cooler running at high RPMs. Colored for high visibility.

Jet Fuel Formulated exclusively for ducted fan engines, Tower Power Jet includes heavy-duty lubricants to handle the extra heat of ducted fan engines, plus additives that keep engines clean, extend glow plug life, and create a vapor trail.

***PLEASE NOTE:** Our fuel shipper recently announced a \$5.00 surcharge on each case of fuel due to new federal government Environmental Protection Agency (E.P.A.) regulations. When ordering, please note that this \$5.00 surcharge will be added to each case of fuel purchased (above and beyond the prices shown). All of us here at Tower regret this action. Since all brands of fuel will be affected, we think that you'll still find Tower fuel to be one of the best values on the market.

HOW TO ORDER FUEL

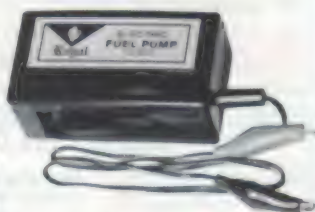

Order just like any other Tower item by using the stock numbers below and the case price shown. The following limitations do apply, however:

- 1) Available in 4 gallon cases only.
- 2) Two-case limit if shipped C.O.D.
- 3) Shippable only to those areas served by ground UPS — No Parcel Post or Federal Express shipments.
- 4) Mixed cases not available.
- 5) Fuel is shipped separately from other items.

ROYAL 12 VOLT ELECTRIC FUEL PUMP

- Hi-speed filling or draining.
- Use with model or diesel fuel.

This fuel pump operates from a 12 volt power source and will allow high-speed filling or draining of your fuel tank. It includes nozzle, filtered fuel can clunk pick-up, alligator clips, and handy, built-in hooks for attaching it to a fuel can. It features a tough fuel-resistant plastic case and can be used with model or diesel fuels. Listings for other fuel products begin on page 269 of our '91 Catalog.

Stock# TC1877 • Retail Price \$22.95 • Now Only **\$13.99**

TOWER HAND CRANK FUEL PUMP

- Moves high volumes of fuel easily
- Delivers 1/4 oz. per revolution.

Made of durable glass-filled nylon, this pump uses a geared pumping mechanism to move a high volume of fuel with only a few turns of the handle. It measures a compact 3-3/16" x 1-11/16" x 1-5/8" and comes with two pre-installed nipples for easy attachment of fuel tubing. Works in forward and reverse and can be permanently mounted to your field box. Fuel tubing is included. For use with glow fuels only.

Engines & Engine Accessories

Buggy

- Value-priced car and buggy engines with high power.

Now the world's finest engines are backed by the best support in the industry. O.S. warrants its engines to be free from defects in parts and workmanship under normal use for two years from the date of purchase to the original purchaser. Ducted fan engines excluded.

O.S.
TWO YEAR
WARRANTY

The .21 RF-B rear exhaust combines performance and value. The .10 FP-BX with recoil starter and .10 FP-B are ideal for all entry-level and .10-sized sport buggy applications. The .12 CZ-2 is ideal for competition-class buggies, while the .12 CZ-R is the hottest .12 engine yet. The .21 SE-R (side exhaust) delivers on high-speed straightaways, with a 29,500 RPM output. The best choice for intermediate off-road drivers is the side-exhaust .21 SE-B engine. All engines feature ABC construction and a heatsink head. .21-size engines do not include glow plugs.

Control Line

- CNC production techniques ensure the highest quality and performance.

The use of state-of-the-art robotics and computerized, numerically-controlled (CNC) production equipment ensures that every O.S. control line engine meets the highest standards and results in unbeatable performance and durability. The same O.S. quality found in FP and SF engines is also available in their Control Line versions of these popular powerhouses. Control-line FP engines, in displacements from .10 to .40, include fuel efficient venturis and extra-long needles. SF Series control-line engines, available in .40 and .46 displacements, come with their own mufflers. All are highly-affordable, backed by the O.S. two-year warranty, and built to run only one way: fast! Glow plugs are not included.

FP Series

O.S.
TWO YEAR
WARRANTY

.40 FP ABC

O.S. FP engines offer fliers value-packed power. Specially designed for easy starts and minimal break-in, all are Schnuerle ported and are equipped with efficient barrel carbs and expansion-style mufflers. State-of-the-art production technology is evident throughout the line. Like the compact **.10 FP ABC**, the **.35 FP** and **.40 FP** for larger sport applications are now equipped with ABC construction, providing high compression and increased output. All engines require glow plugs.

O.S. Parts Pack include drive washer, prop washer, prop nut, screw and gasket set, thrust washer, needle, and much more to help you keep your .35-.40 FP engine in peak condition. **O.S. Engine** and **Carburetor Booklets** include exploded parts diagrams of all engines and carbs to help you perform maintenance on your O.S. engine or carb.

SF/RF Series

There's no finer value in a Sport Engine.

Now the world's finest engines are backed by the best support in the industry.

O.S.
TWO YEAR
WARRANTY

O.S. warrants its engines to be free from defects in parts and workmanship under normal use for two years from the date of purchase to the original purchaser. Ducted fan engines excluded.

- Features and performance available nowhere else.
- Pumped engine efficiency available in .46 SF and .61 SF models.
- All backed by the 2-year O.S. warranty!

.25 SF

The O.S. SF/RF Series engines now carry the banner for the entire O.S. line. The **.25 SF**, available in ringed piston and ABC versions, offers the improved power and performance that is standard throughout the SF Series. It gives your small craft the power to execute quick, precise maneuvers. The **.40 SF** is the state-of-the-art in mid-sized power. The **.46 SF** with or without pump also features higher output, easier adjustments, lower noise levels, and low vibration. Both have all the ingredients for flying success: Schnuerle porting, double ball bearing-supported crankshafts, competition Type 4D carbs, expansion mufflers, and one-piece crankcases.

The **.46 SF ABC-R** is a new reverse crankshaft model designed for use as a pusher engine with standard props. For larger models, there are ringed piston and ABC versions of the **.61 SF Side Exhaust**, a long stroke engine that's available with or without pump. For outstanding value and performance--it's O.S.! All engines require glow plugs.

Engines & Engine Accessories

- Dependable O.S. performance for your helicopter.

You need dependable performance from your helicopter engine, and O.S. supplies it. All O.S. helicopter engines, from the .32 F-H (also available with rear start cone or recoil starter, and perfect for most .30-sized helicopters) to the .46 SF-H, feature the quality you expect—Schnuerle porting, efficient carbs, finned heatsink heads, and much more. The .32 F-HX features a recoil starter and is ideal for the Hirobo Shuttle. For helicopter traditionalists, the .61 SFN-H and rear exhaust .61 RFN-H feature a Type 6B carburetor, a new case, and the same bore and stroke length as the .61 FSR-H. Both are available in ABC versions. Whether you fly a .30-size or .60-size model, O.S. offers a helicopter engine that delivers power and performance flight after flight.

Helicopter

- Now a complete line of 4-cycle engines!
- The best 4-cycle performance for your models.

From the 26 Surpass to the 120 Surpass, all Surpass engines offer good fuel economy, great horsepower, consistent operation, and long life. All come with silencers and provide you with the finest quality, durability, and finish.

The FS-120 Surpass II 4-cycle engine features an improved, integrated carb and pump for better aeration, better performance, and improved fuel economy, regardless of attitude or orientation. For pattern 4-cycle pattern fliers who need added power and fuel economy, the FS-120 Surpass II fills the bill. All engines come with glow plug.

Surpass™

Now the world's finest engines are backed by the best support in the industry. O.S. warrants its engines to be free from defects in parts and workmanship under normal use for two years from the date of purchase to the original purchaser. Ducted fan engines excluded.

FSR Series and BGX-1 3500

- Unmatched for quality and range of size.
- Outstanding engines for sport fliers and world-class competitors alike.
- Easy to start and exceptionally reliable.

The O.S. FSR Series is unmatched for quality, with ball bearing-supported crankshafts, Schnuerle porting, mufflers, and carburetors precision-fit for high power and easy adjustments. The .32 F offers ABC construction for mid-sized craft. In large scale, the 1.08 FSR puts out more power for its size and weight than comparable gas-powered engines. The 2.135 cu. in. (35CC) BGX-1 3500 for giant-scale applications offers lower vibration levels, higher output, and a lighter weight (20.7 oz. without header) than conventional gas-powered engines. The backplate radial mount matches the ST3000 bolt pattern for easy conversion. All engines require glow plug.

Engines & Engine Accessories

SUPER TIGRE™ S-Series

- SuperTigre performance and reliability!
- Ideal for competition and sport fliers.
- Precision ball bearings for smooth operation and long life.

S-Series engines are high-powered, consistent performers that feature Schnuerle porting, ball bearing-supported crankshafts, ABC construction (available on most models), and new, lightweight cast heads. Most come with muffler, and all include glow plug. For dependable performance in mid-sized sport or pattern craft, fliers can rely on the **S-40K** (available in ringed version only) or the **S-45K** engine (available in ABC version only). The **S-61K** offers the same for serious sport/pattern fliers. It's available in both ABC and ringed versions and comes with muffler. Fliers needing great power can choose the **S-75K** or **S-90K**, two engines that provide extra power without unnecessary extra weight.

SUPER TIGRE™ G-Series Engines

SuperTigre's **G-34H** is designed to fit many popular .30-sized helicopters. It weighs 9.5 ounces, and produces 1.1 bhp at 16,000 RPM. The G-34 features dual ball bearings for smooth operation and ABC-ring cylinder assembly for easy starting. Glow plug is included. The newest members of SuperTigre's product line are three new ringed piston engines, the **G-34 Ring**, **G-51 Ring**, and the **G-51 Ring C/L**. All three feature economical ringed piston construction for economy and performance, and come complete with muffler.

SUPER TIGRE™ Giant Scale

Get the performance and reliability your plane requires with SuperTigre's giant-scale 2-cycle engines. The Schnuerle-ported 1.5 cu. in. **S-2500** and 1.8 cu. in. **S-3000**, are designed for the most demanding use in giant-scale aircraft. They deliver high-performance power at intermediate RPM ranges, along with low fuel consumption rates and low noise levels.

G-4500

For craft of 15-25 lbs. with spans from 8-12' nothing beats the **G-4500**. Engineered with traditional SuperTigre innovation, it's a 45cc, 2.76 cu. in. powerhouse that enables serious giant-scale enthusiasts to send their aircraft through maneuvers with ease. More than a beauty alone, the G-4500 starts easily, yet produces a thundering 4.5 HP! All three include radial mount and glow plug. Mufflers available separately.

IRVINE™ Marine & Buggy Engines

Irvine car/buggy engines are easy to start, easy to tune, and feature Schnuerle porting, special air-cooled heads, big-bore carburetors (except for the .21-R ABC), and ball-bearing supported crankshafts.

All Irvine marine engines come with a flywheel, water-cooled jacket, and exhaust manifold. Schnuerle porting and ball bearings are also standard equipment.

Tower Hobbies Brings You The Best of R/C For Less!

K&B AIRCRAFT ENGINES

K&B's **Sportster .20, .28, .45, and .65** engines all feature Schnuerle porting, AAC (aluminum, aluminum, and chrome) cylinder and piston construction, new carburetors with easy idle adjustments, engine mounts, and quiet mufflers with rotatable exhaust outlets—plus a lifetime warranty against manufacturing defects. K&B's **.40 R/C** now includes an aluminum connecting rod, front and rear super bearings, all-metal K&B carb, and more improvements. The **.61 R/C** is ideal for pattern fliers, with ball bearings, an all-metal carb, bolt-on muffler, and glow plug. The powerful **.82 Ducted Fan** engines include advanced engineering such as quintuple engine porting, super ball bearings, ABC piston and sleeve, hardened steel crankshaft, and machined steel rotor disc. Weight is 23 ounces and output 4.2 horsepower. Both Cooks and Byron versions require glow plugs.

41.99

FOX ENGINES

Fox Engines are an all-American value. Each airplane engine includes glow plug, muffler, and the exclusive MKX carb for easy starts and smoother running. The muffler on ball bearing **Fox .25** can be moved for right, left, or rear exhaust applications. The newest **Fox .40** features a bushing main, iron piston, and steel sleeve; also available is a **.60** ball bearing version, and a Schnuerle-ported, ball bearing ABC version that includes spinner. Other top mid-sized choices include the **Fox .45** and **.50** ringed piston engines. Both the large-size **.60** and bored-out **.74** Eagle engines feature beefier crankshafts and stronger crankcases. The Schnuerle-ported **.74** heli engine features a heatsink head and heavy-duty crankshaft for top power. Muffler required.

AIRTRONICS INC XL2P 2-CHANNEL RADIOS

- New XL2P with Contender Speed Control is a complete competition package.
- Includes low throttle and throttle end point adjustments.
- Designed for high performance cars and boats.

Airtronics' XL2P is an excellent 2-channel pistol grip with the most requested features included at an affordable price. The XL2P is designed for high-performance radio-controlled cars and boats. Among its many features are low throttle, steering rate, and throttle end point adjustments; servo reversing, lightweight mini-receiver, and a pistol-grip wheel with adjustable steering tension. In addition to being available with two standard #102 servos or two mini, ball bearing, high speed #831 servos, Airtronics now offers a new competition version with one #102 servo and Airtronics' new electronic Contender Speed Control. The XL2P requires eight "AA" batteries for the transmitter.

AIRTRONICS[®] INC. VANGUARD RADIOS

Perfect for beginning and sport fliers, the Vanguard **VG4R** and **VG6DR FM's** utilize Airtronics' reliable Gold Label super narrow band dual conversion receiver for superior aircraft performance and control. The new **VG4R** for sailplanes comes with two new lightweight Microlite servos, 250 mAh receiver battery pack and new micro 4-channel receiver. The new **VG4R** for electric planes includes two 501 servos specifically designed for electric aircraft and an MA6 electronic speed control. The **VG6H** for helis comes equipped with tail-rotor compensation, servo reversing, dual rates, throttle hold, idle up, pitch trim, hi-pitch trim and a gyro-select switch. All Vanguard FM's feature high quality rechargeable NiCd batteries, servo reversing on all channels, dual conversion super narrow band FM receiver, adjustable length and tension sticks, high quality precision gimbals and trainer system.

Vanguard **PCM's** are specially designed to meet the needs of competition fixed-wing aircraft system operation. They feature transmitter low voltage alarm, programmable fail/safe, dual conversion super narrow band FM/PCM receiver, FM/PCM or FM/PPM select switch, receiver low voltage alarm, high quality rechargeable NiCd batteries, servo reversing on all channels, precision gimbals and adjustable length and tension sticks.

Futaba® Our Best Selling 4-Channel Radios! 4NBL "ATTACK" RADIOS

- Specially designed for three different types of aircraft, the 4NBL has something for everyone!
- All with servo reversing, rechargeable transmitter NiCd pack, adjustable stick gimbals, and more.

Futaba's 4NBL radio system is customized for fliers of all types of aircraft. This 4-channel, narrow-band system is equipped with servo reversing, a rechargeable transmitter NiCd pack, adjustable stick gimbals, and more. As the perfect system for all conventional aircraft, the 4NBL with three S148 servos includes an R114H receiver and full NiCds. Tower also now stocks the 4NBL on 75 MHz. Great for Kyosho's Blizzard and boats. Call for availability.

A second version of the 4NBL includes two S133 mini servos (weighing just 0.6 oz. each) and is designed for sailplane and small aircraft enthusiasts. Also included is the R114H receiver plus a 250 mAh NiCd pack.

The third version is destined to become a favorite among electric fliers. Available with two S133 mini servos, this 4NBL features an MCR-4A integrated receiver which combines the 4-channel receiver and a MOSFET electronic speed control into a very compact and lightweight package. It also incorporates battery eliminator circuitry which eliminates the need for, and extra weight of, a receiver battery.

Futaba® 7-CHANNEL RADIOS

7UAPS

- Excellent choices for airplanes and helicopter pilots alike!
- State-of-the-art technology for superior flying.

Futaba's 7-channel radio systems combine convenience with state-of-the-art technology. The sophisticated 7UAP offers programmable mixing, snap-roll function, timer, dual rates, exponential, and more, including stepless PCM 1024 technology for outstanding control and response. Control airplanes, helicopters, or sailplanes with the incredibly versatile 7UAFS FM and 7UAPS PCM systems, which feature programmable memory for up to 4 different models!

Serious helicopter fliers can enjoy top radio technology with Futaba's 7UHF FM system. Similar in design to the 7UAP, it adds such features as invert switch, hover memory, pitch mixing, tail-rotor mixing, and more. The affordable 7UHP adds stepless PCM control to the 7UHF's features, for the ultimate in precision performance.

Each of these 7-channel radio systems is ready for 1991 and ready to take you soaring into the 21st century.

Futaba® 2PBKA MAGNUM JUNIOR AND 2PB MAGNUM SPORT

For competition features and performance, the 2PBKA Magnum Jr. and 2PB Magnum Sport can't be beat! Both feature light, well-balanced pistol grip transmitters for fatigue-free operation and a solid feel.

The 2PBKA comes with BEC (battery eliminator circuitry). You can do precise adjusting with its superfine, ratchetless trims for steering and throttle ATV. It is available with two S148 or two S132H servos. Two versions that include an MC112B MOSFET speed control come with your choice of one S148 or one S132H servo.

The 2PB (with BEC) comes in a standard version with servo reverse and two S148 servos, a version with MC112B MOSFET speed control and one S148 servo, and a new monster trucker's version with one S148 servo and one S9301 heavy-duty steering servo. All are available on 27 and 75MHz. Transmitters require 8 "AA" batteries.

READY FOR
1991

Futaba's 4-channel 4NBF and 4NBP systems offer you incredibly versatile and dependable control for 1991 and beyond.

Both systems offer the features fliers want most, including servo reversing, full NiCds, adjustable sticks (for customizing the feel of the transmitter to your own touch), and trainer system, which allows the transmitter to be linked to that of an instructor for safe training flights. Also included are Futaba's 1991-ready dual-conversion, narrow-band receivers: by filtering and strengthening control signals for improved resistance to signal interference, they provide you with new levels of precision control and response for outstanding flying.

The 4NBF FM system comes with three responsive, high-torque S148 servos and Futaba's compact R127DF dual-conversion narrow-band receiver. The 4NBP PCM system adds fail-safe to the control features mentioned above. It also includes three S148 servos plus Futaba's R124DP dual-conversion narrow-band receiver. For the latest in high-tech 4-channel aircraft control, turn to Futaba — a leader in 1991 radio technology.

FUTABA GYRO

Great for use with Kyosho's Concept 30 Helicopter.

These gyroscopes can be connected to any one single function to keep the model stable in one axis (roll, pitch, or yaw). Helicopter fliers can connect it to the tail rotor. Included are the gyroscope control box and control amplifier. A variety of gyros compatible with Futaba J and FN/G systems are available.

FUTABA RADIO ACCESSORIES

Aileron Extension Cord - G

J-Type Switch Harness w/Charge Cord

Quick frequency changes are possible with an AM or FM Crystal Set. For receiver or transmitter power, use Futaba's standard replacement NiCds. Aileron extensions increase the distance between the aileron servo and receiver to make removal of your airplane's wing easier. Futaba's Switch Harness is available with or without a charge cord. Futaba offers a wide range of accessories for their radio systems: see below.

KYOSHO® ADVANCE: YOUR BEST BUY IN 1991 RADIOS

This Gold Label means that Advance radios have met 1991 narrow band requirements!

The 6FM-H flight pack includes five KS-100 servos with 38 oz./in. of torque, a 1000mAh battery and a dual conversion receiver.

Controls on Advance radios are located for quick, easy access.

Advance radios are now AMA certified and listed for 1991!

Kyosho Advance Series radios offer the greatest overall reliability and convenience for your money. Each one includes a 1991-certified dual-conversion receiver — an investment in radio equipment that will pay big dividends in interference rejection and improved control response in the years ahead.

Advanced design places every function exactly where you need it, yet allows the flexibility needed to customize your transmitter to your own personal needs. Height adjustments on the control sticks allow you to fine-tune for the correct feel, while molded finger grips on the back of the transmitter add greater comfort. A carrying handle and hook included for neck straps (not supplied) add to your convenience.

The new **Advance 6FM-H**, a complete 6-channel radio system for beginner and intermediate heli fliers, offers more functions than other beginner systems. Its features include collective pitch to throttle mixing, pitch trim and pitch curve adjustments, revolution mixing, throttle hold (for autorotations), and independent high/low throttle endpoint adjustments. A gyro switch controls sensitivity in flight for gyros with two settings. It also features servo reversing on all six channels.

The **5-channel PCM** transmitter includes a variable hold/fail-safe feature. Should your signal be interrupted in flight, the variable hold will maintain the last servo position until the interference subsides. If the interruption is longer than 0.8 second, the fail-safe takes over. The receiver responds to pre-set function commands, giving you the time to escape from danger.

The **7-channel FM** includes aileron/rudder mixing, V-tail mixing engaged with an on/off switch, and a travel adjustment for both elevator and aileron.

Both the 5PCM and the 7FM come with four KS-100 servos providing 38 oz.-in. of torque. The servos feature indirect pot drive and a bushing on the output shaft for smoother operation and long life. The 7-channel's receiver is 1991 narrow band, with crystal filtering and dual conversion. The 5-channel includes an FM/PCM receiver with dual conversion. Both include full transmitter and receiver NiCds and charger. The 6FM-H comes with five KS-100 servos, a larger capacity 1000 mAh receiver battery pack and a dual conversion receiver specially designed for helicopters.

Whatever type of system you're looking for, get the aircraft and heli systems that offer you 1991-ready technology at a low Tower price.

Radios & Radio Accessories

COX SIDEWINDER 2-CHANNEL RADIO

- Sidewinder—a "twist" in 2-channel comfort.
- Includes micro servos, "AAA" battery box.

The best radio match for Cox's .049 Nissan GTP and .049 Stocker! Ergonomically-designed Sidewinder 27 MHz 2-channel pistol grip radio is ideally balanced, with an angled head that positions control wheel for maximum operator comfort. Changeable crystals make frequency changes a breeze. Receiver, 2 micro servos, and "AAA" battery box included. Eight "AA" and four "AAA" batteries required.

Stock# TC1932** • Retail Price \$135.95 • Now Only **\$79.99**

COX CADET 2-CHANNEL RADIO

Ideal for use with many Cox aircraft, the Cadet 2-channel radio system uses low-cost "AA" alkaline cells, combining value with affordability. Durable, black plastic transmitter case features a handy carrying handle, power output meter, and lightweight construction for pilot convenience. Also included are two micro servos, receiver, frequency flag and TX numbers, plus "AA" battery box. Requires 12 "AA" batteries.

Stock# TC1931** • Retail Price \$127.95 • Now Only **\$69.99**

TEKIN MINI RECEIVER

- Ideal for tight surface applications.
- Ultra-light, to minimize parasitic weight!

When space and weight limitations are a consideration, Tekin's Mini Receiver comes through. Just 1.0" x 1.125" x .4375" in size, it fits in the tightest hull and body installations...and at just .5 oz. in weight, it helps conserve battery power for greater speeds and longer runs. Available on 75 MHz frequency, complete with a Futaba J connector.

Stock# TC1973 • Retail Price \$74.00 • Now Only **\$46.99**

NOVAK STUTTER STOPPER

- Prevents premature battery depletion during races.
- No more "glitching" when you accelerate.

Sudden acceleration (especially with today's hotter, modified motors) can cause radio and battery problems. Economical and easy to install, Novak's Stutter Stopper plugs into your car's receiver; under heavy acceleration, it acts to "de-glitch" your radio signal, but also acts as a battery "buffer", to prevent your motor from wasting power you may need for a grandstand finish! Available with Futaba G or universal plugs.

Stock #	Description	Retail	Now

KYOSHO® SERVOS

- High-quality servos for car and aircraft use.
- Dependability for all R/C applications.
- Make it move with Kyosho muscle!

KS-30

SAVE
\$4.00 Off
Last Tower Talk
On Micro Servos

Kyosho's **KS-91** spans the entire spectrum of R/C racing, sailing, and flying. Standard equipment in Kyosho's Pulsar and Impulse II 2-channel radios, it weighs just 1.6 oz., and provides a hefty 34 oz.-in. of torque from a space of just 1.56" x 1.44" x .50".

Able to generate 38 oz.-in. of torque, the KS-100 servo has muscle enough to handle any sport flying application. Features include indirect pot drive, and a bushing on the output shaft for smoother action. Weight is 1.61 oz.; dimensions are 1.6" x 1.9" x .8".

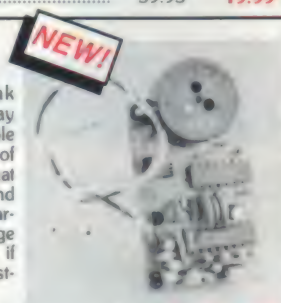

By contrast, the KS-10 is a coreless micro servo that measures only 1.1" x 1.03" x .47". Its small size and light weight (.5 oz.) make it one of the smallest micros available, yet it delivers a whopping 26.6 oz.-in. of torque for the most demanding applications.

Applications that demand mini servos demand the KS-30; on demand, it will deliver 16 oz.-in. of torque fast as a snake yet, at just .8 oz. and 1.34" x 1.26" x .55" it can fit in 1/12 scale cars, sailplanes, and virtually any model requiring mini-size and maxi-muscle.

TME GUARDIAN ANGEL

Don't lose your favorite plane to weak batteries...install the Guardian Angel's 6-way protection and fly with confidence. Audible voltmeter not only keeps you constantly aware of receiver battery condition, but also reminds you that receiver is on. Included battery cycler helps extend battery life, as well. Sophisticated alarms signal channel status before you fly, allows you to test range before you fly...and provide a loud sound beacon if your plane goes down out of eyesight! A "must-have" for the well-equipped pilot!

Stock# TC3211 • Retail Price \$39.95 • Now Only **\$31.99**

ROYAL MAXI TITAN SERVOS

Built for the most demanding R/C applications, Royal's new Maxi Titan servos feature a bearing-supported output shaft for additional support. Put 'em in 1/4 scale cars, boats or your biggest monster truck; Maxi Titans deliver an incredible 112 oz.-in. of torque with a travel time of just .22 seconds/60". Compared to a weight of just 3.7 oz., they're one of the most compact parcels of model muscle around! Available with 5 connector choices.

BALSA BUNDLES & ASSORTMENT

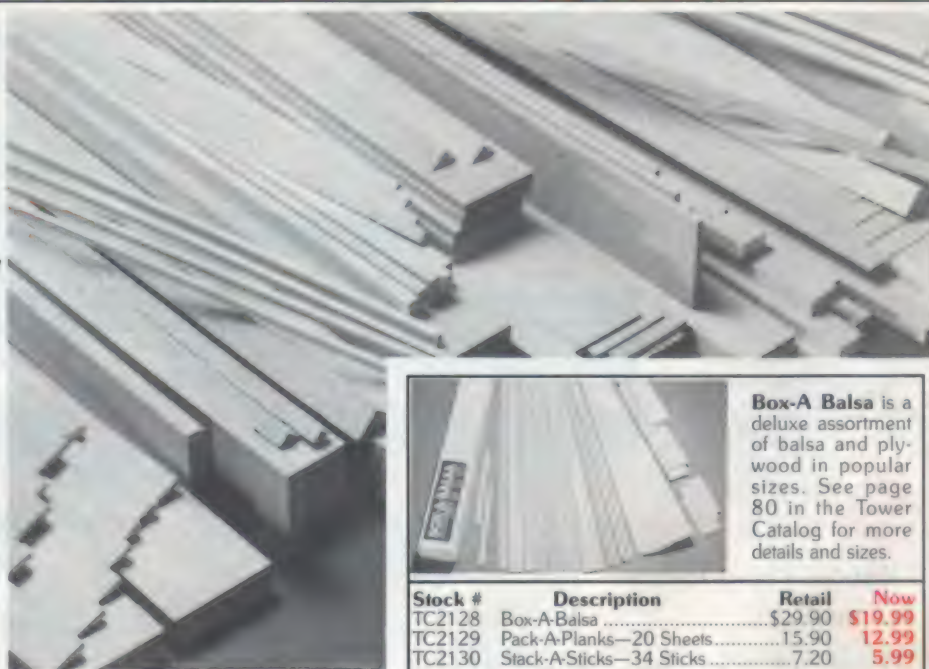

- The best-quality balsa for building and repairs.
- Incredible variety available at volume-buy prices!

When only the best balsa will do, Tower Hobbies Balsa is the balsa of choice.

Tower Hobbies Balsa is all Grade AAA wood, carefully hand-sorted and selected for proper density before shipment. Strict quality control ensures that Tower Balsa is consistently excellent, piece after piece, project after project.

And you'll find that excellence throughout Tower's incredible selection of shapes and sizes, from 1/8" x 1/8" x 36" triangles to 3" x 3" x 30" blocks. There are bundles of planks, sticks, triangles, tapered aileron stock, and blocks, plus our economical **Stack-A-Sticks**, **Pack-A-Planks**, and **Box-A-Balsa** assortments—high-quality balsa for virtually any modeling project you can imagine.

In addition, buying and packaging balsa in volume allows Tower to offer balsa at the lowest price anywhere. With quality, selection, and low price, it's no wonder that Tower Hobbies Balsa is the modeler's balsa of choice!

Box-A Balsa is a deluxe assortment of balsa and plywood in popular sizes. See page 80 in the Tower Catalog for more details and sizes.

DREMEL #572 DELUXE MOTO-SHOP

Compact Deluxe Moto-Shop is a versatile jigsaw/workshop combination. Works best on stock 1" thick, but can handle stock up to 1 5/8". Deep, 15" throat. Front/side blade mounting slots allow scroll cuts or ripping of long materials. Table tilts 45° to either side for accurate angle cuts. Included accessory pack contains rubber backing pad and adapter, handheld flexible shaft for carving/inside sanding, plus sanding discs, saw blades, cloth wheel, wire brush and 12-piece accessory set. Powerful ball-bearing motor develops 3450 RPM, for smooth cuts in light gauge metal, plastic, felt and wood. See page 244, '91 Catalog, for blades and accessories.

Stock# TC1275 • Retail Price \$165.00 • Now Only **\$94.99**

DREMEL MOTO-TOOL KITS

All three Moto Tools feature 1.15A, ball bearing motors with a 5,000-30,000 RPM range. #3950 includes a 40-piece accessory/bit assortment; economical #5950 includes 20-piece assortment. Both feature a tough, double-walled polyethylene storage/carrying case. New **Super Kit** includes Moto Tool, flex-shaft, 32-piece accessory set, and deluxe carrying case with removable, 92-bit capacity tray. All feature keyless chuck.

Hobbico® BULLET™

- Bonds great to balsa, plastics and fiberglass.

Hobbico Bullet CA glues bond to balsa as well as plastic and fiberglass! Thin, instant-setting Bullet CA is ideal for pre-fitted parts with no or very slight gaps. Thicker Bullet CA+ fills gaps, and cures in 10-15 seconds. Make fillets, fill gaps or bond high-stress areas with super-thick Bullet CA-, which cures in 1-2 minutes. Debonder dissolves all CA glues. Activator speeds the cure time of all CA glues. Threadlock prevents bolts and screws from vibrating loose. Bullet Glue Combo includes a 2 oz. bottle each of: CA, CA+, and CA-. Inexpensive Applicator Tip six-packs offer pinpoint placement and disposable convenience.

Boats & Boat Accessories

KYOSHO® HURRICANE™

- Adjustable trim tabs enhance stability and handling at high speeds.

If you'd like to lay claim to undisputed bragging rights at your local pond, check out Kyosho's newest, sleekest craft. The 31" Hurricane electric-powered, off-shore racer takes advantage of the highly-efficient Jet Stream outdrive system, adapted to include twin LeMans 360ST motors, and the hottest scale catamaran hull to hit the water. Durable and lightweight, the 10.6" wide Hurricane ABS hull comes as one piece for simplified assembly. Two adjustable trim tabs keep the boat running at just the right attitude, permitting razor-sharp turns and stable high-speed handling. Kyosho's heavy-duty rotary speed control is also included.

The Hurricane's looks are as astonishing as its performance — this screamer is so attractive that you'll be tempted to put it on display with the included attractive wood stand when you're not at the pond. Striking decals and a realistic cockpit with pilot and throttle man figures make the

Pre-built Catamaran with Hot Twin Motors

Hurricane the "eye of the storm" anywhere. For required items, choose Airtronics VT-2P Pistol Radio (page 30). Hobbico's #900 AC/DC Auto Charger (page 54), and Kyosho's 6- or 7-cell racing packs on page 57.

40

Keep an eye out for the shore patrol. Because the 24" GP Marine Stinger is competitively fast AND delivers long run times, the temptation to break speed records is irresistible! The revolutionary Twinline drive system uses two in-line 550-sized motors to provide 5-7 minute run times and speeds of up to 20 mph. Features include pre-joined ABS hull and deck, speed control and colorful decals. Assembly takes under an hour. Requires a 2-channel radio, two 6-cell batteries (try 7-cells for even more power), and charger.

Name _____

Address _____

City _____ State _____ Zip _____

Illinois residents add 7¼ % sales tax. Offer available to USA residents only.

GUARANTEE:

You will save more than the cost of your membership fee during your first year or Tower Hobbies will credit your fee in full.

This offer expires April 30, 1991.

1. Have all stock numbers and prices written down.
2. Give our sales representatives the ad number and customer number on your address label. These numbers speed up your order and helps us identify you.

- We will accept merchandise for return within 10 days of receipt for any reason as long as merchandise is in new and unused condition and in its original packaging. Please see your Tower Invoice or page 286 of our Catalog for "Instructions for Returning Merchandise."
- If your return is part of a Combo and you are requesting a credit or refund, we reserve the right to pro-rate credits on these items.

P.S. Are you phoning in your order? Use the order form to organize your order information and to provide you with a written record.

For Express Service orders to Alaska, Hawaii and Puerto Rico, add \$10.00 surcharge, and allow one more day for delivery. All Express Service orders automatically receive our Internal Zip Priority Handling Service.

Tower Talk and the annual Tower Hobbies Catalog (the R/C industry "bible") bring the world of radio control modeling to your fingertips, with everything from small building accessories to radios — only a stamp or a phone call away. Please follow these instructions and use the order form for your convenience.

- To order a radio on a particular channel number, first check the chart below.
- **Replace** asterisks in the stock number with channel number or channel code shown on the chart below. **Example:** the stock number of a Kyosho Advance 7-channel radio is **TC1945****. To order a Kyosho Advance 7-channel radio on Channel 64, change stock number from **TC1945**** to **TC194564**.
- Indicate 2nd and 3rd channel number choices to speed up order delivery.
- If you have no channel number choice, leave asterisks in place. We'll send you any channel number that's in stock.

Since radios aren't available on all channel numbers, please remember:

- Radios designed for aircraft use will usually not be available on car/boat, and vice-versa.
- Please note 2nd and 3rd choices as alternates in case your first channel choice is not in stock. If you're calling in your order, the phone representative will be able to tell if your choice is in stock or whether an alternate is needed. Of course, if you only have one choice, we will send it if it's in stock. If you furnish only one channel choice and it's not in stock, we'll backorder it, even if other channels of that radio are in stock (some radios and channel number choices may not be backordered).

KYOSHO

FAIRWIND™ and RIVIERA™

The Fairwind's aluminum mast rises over 5' above the water from a glossy ABS hull; included are nylon sail with battens and scale fittings set. This graceful vessel offers classic sailboat looks, and cuts through the water just like a real race-winning yacht. Sail it with one channel of control (rudder only), or with 2 channels when you install an optional sailwinch servo for sail control.

Sail affordably with the 38" high Riviera. The laminated polystyrene/foam hull, metal mast, and radio compartment are pre-built. Hardware, decals, and display stand are included.

The Riviera requires a 2-channel radio with two standard servos, one for sail control and one for rudder. Save by ordering the Fairwind with radio and sailwinch servo, or the Riviera with a Kyosho Impulse II 2-channel radio, at Tower's low combo price.

Fairwind

Length: 36"

Height: 61 1/2"

Requires:

BATTERY!**

Jet Stream GP-10 Gas Model Length: 34.6" Width (Beam): 8.2" Engine: O.S. .10 FP-M (included)	Jet Stream 800 Electric Model Length: 34.6" Weight: 4.1 lbs. Motor: LeMans 360ST
-------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------

JET STREAM GP-10

Gas Powered Racer!

The 35" long Kyosho Jet Stream off-shore deep vee boasts an 8.2" beam and a revolutionary new stern outboard drive with a gear-driven stainless steel driveshaft. The prop and rudder move together for precise steering control, high-speed maneuverability, and added power. The electric Jet Stream 800 is amazingly fast with the included LeMans 360ST motor and a 6-cell pack; with a Y-harness and a second pack. For gas enthusiasts, there's the Jet Stream GP-10. The included O.S. .10 FP-M engine is a water-cooled, Schnuerle-ported powerplant that offers blazing speeds and recoil starts!

The Jet Stream molded white ABS hull is ready for decals and your own custom paint scheme. The detailed cockpit includes instrument panel and a trio of pilot figures. Both versions require a 2-channel radio. The electric Jet Stream 800 also requires a 6-cell battery and charger — available at special savings in the Combo. The electric Jet Stream 800

Ultimate Combo includes everything you need to put the boat in the water: kit, paint, brush, 12 "AA" batteries and a 2-channel radio. Check out the savings on the gas Jet Stream GP-10 combo, too.

Mini-Tach

- LCD display is easy to read even in direct sunlight.

- Works with 2 & 3 bladed props.
- One year limited warranty protection.

The easy-to-use **Mini-Tach** lets you peak your engine for maximum RPM and evaluate the effects of different props and fuels. Simply point it at the spinning propeller and read the RPM shown on the digital LCD display (in increments of 100 RPM). It has an operating range of 0-29,000 RPM and comes assembled with batteries included. Works with 2- or 3-blade props.

TOWER HOBBIES Deluxe Power Panel

19⁹⁹

The **Tower Hobbies Deluxe Power Panel** allows you to power all of your electronic field equipment from a single 12 volt battery. If your field box holds a 12 volt battery, you can install the Power Panel permanently and keep everything in one handy package. It provides 12 volt power to your electric starter, 12 volt or 6 volt power to your fuel pump, and 1-1/2 volt pulsed power to your glow plug for fast starts in all conditions.

The Deluxe Power Panel has a variable control knob and meter, enabling you to adjust the glow plug current, check for burned-out plugs, and detect engine problems. It's 6" wide, 3-3/4" high, and comes complete with 6 banana plugs and 2 alligator clips. Adding to its value — warranty protection for one full year!

DURATRAX® FIELD BAGS

- Two roomy sizes—three hot color combinations.
- Fully collapsible for easy storage.
- Each side includes storage pockets.

If you're buying a car or truck, don't forget the field bag! Two sizes of new **DuraTrax Field Bags** easily carry your model plus tools and radio: deluxe measures 18" long x 10" wide x 10" deep, and extra large measures 22" long x 12" wide x 10" deep. Fully collapsible, yet they build up quickly with attached hook & loop fasteners into durable totes with sturdy side walls and a protective top, covered with a washable nylon fabric. Every side includes storage pockets. The handles, hand-stitched completely around each bag, won't come loose with wear. Choose from turquoise/blue, fluorescent orange/navy, or red/black, all with the DuraTrax logo screened on the side.

Tower Hobbies Brings You The Best of R/C For Less!

TOWER HOBBIES® TOWER POWER DELUXE 12V STARTER

- Unique switch design for years of reliable service.
- Textured finish for a sure grip.
- Speed and torque to start engines up to 1.8 cubic inches.

The **Tower Power Starter** is a deluxe, 12 volt model that features a deluxe aluminum starter cone with a V-groove and rubber insert, plus self-adjusting carbon brushes. An "easy press" start switch makes starting easy without requiring heavy finger pressure. A built-in finger guard promises safe starts. It easily starts engines up to 1.2 cubic inches. The **Tower Power Heavy-Duty Starter** has a larger armature that results in more torque, giving you the power to start engines up to 1.8 cubic inches. It's as easy to hold and operate as the Deluxe Starter. Both are perfect for airplanes, boats, helicopters, and cars. Add to their convenience with inexpensive replacement rubber adapters for spinners or cars.

Hobbico® Ultra-Tote

For convenience at the field and all-around durability, the **Hobbico Ultra-Tote** receives outstanding marks. The kit's main parts are made from 3/8" and 1/4"-thick plywood for strength and durability. The large, deep drawer is held closed with a hook and loop strip when the box is in transit. An opening for a power panel easily accepts all popular models. The 12V battery powering your equipment is stored in a separate compartment with cooling slots to prevent damage from heat buildup. Fuel storage area is provided for a 1-gallon can or plastic bottle of fuel. For more convenience, foam-padded cradles are attached which can be adjusted or removed.

The **Ultra-Tote** comes in kit form with detailed instructions for easy assembly (decals and paint not included). Measuring 19" x 13 3/4" x 8 1/4", it's built to provide many years of handy use. The **Combo** includes **Ultra-Tote** with the **Tower 12V Field Battery**, **12V Charger**, **Tower Power Deluxe 12V Starter**, **Glow Plug Clip**, and **Power Panel**.

- Panels made of durable, 3/8" and 1/4" plywood.
- Compartments for both bottles and cans of fuel.
- Convenient size and easy to assemble.

Hobbico® HOT-SHOT & SUPER HOT-SHOT

- Compact locking clip/NiCd combos power a full day of fun!
- Recharge overnight with included wall adapter.

The **Hobbico Hot-Shot** combines a locking glow plug clip designed to fit standard or 4-cycle glow plugs with a high-capacity, 1.2V, 1400 mAh rechargeable NiCd. The result is a portable, reliable power source for starting your model car, boat, or airplane engine.

The **Super Hot-Shot** includes a long-reaching glow plug clip and a 4000 mAh NiCd battery -- a combination that results in enough power for an entire day's worth of modeling activity, or roughly one continuous hour of use. Both units include a heavy-duty wall outlet adapter that lets you recharge the battery overnight. An LED indicator lets you know when the charge is in progress. Whatever your glow power needs, you'll have the answer with a Hobbico Hot-Shot or Super Hot-Shot glow plug starter.

DTX-4 ELECTRONIC SPEED CONTROLS

59⁹⁹

Even if you're racing on a "beginner's budget", you can still enjoy pro-quality acceleration and response with the DuraTrax DTX-4 electronic speed control.

Priced dollars less than the competition, the DTX-4 leads the pack in putting dependable electronic speed control in your hands affordably. Fully-proportional control gives you the smooth, split-second response you need for top acceleration out of the hole, and harnessing power through tight spots in the track.

And while it's first in affordability, the DTX-4 is second to none in durability. Manufactured to strict quality controls here in the U.S.A., the DTX-4 comes with a full 120-day warranty, guaranteeing your satisfaction. And since it's equipped with TEMPFET® technology, your DTX-4 will automatically react to overloads by shutting down, saving you the cost of costly repairs or replacements.

The DTX-4 comes with tool kit, complete instructions, and your choice of Futaba J, Airtronics, Kyosho, or JR Propo connector. For the money, it's the best electronic speed control, ever!

KYOSHO LE MANS

There's a low-cost, high-powered LeMans motor for virtually every application. The 240ST is a high-speed, off-road sprint motor that's the stock powerhouse in the Turbo Optima Mid SE. The 360ST with bronze bushings and ball bearing-equipped 360PT are high-torque motors designed for heavy-duty off-road or R/C boating use. The 600E is a long-duration motor that offers a peak of 18,000 RPM. The M36 is a high-speed motor for electric planes that reaches 21,600 RPM. The Stock 05 is an economical replacement motor for all around use that's also used as the original powerplant in models like Kyosho's Double Dare, Sideways, Buick Stocker, and Ultima II. It's also available in a reverse rotation model for paired power in monster trucks. The AP-29 has proven itself in many Kyosho electric aircraft; available in both normal and reverse rotation, it's an ideal 380-sized replacement motor for boats and planes. For Baja Bugs, Mini Stockers, Formula 1 Racers, and 1/8 scale motorcycles, Kyosho offers the DM20 replacement motor, and upgraded performance with the ball-bearing DMC 20 BB.

BIG BOSS™

Take charge with the power and performance of the 2WD Big Boss!

\$119.99

TC2005

NOW WITH METAL BUSHINGS

Length: 18.3"
Width: 11.8"
Height: 10.4"
Weight: 5.8 lb.
Wheelbase: 11.5"
Motor: LeMans Stock 05 (incl.)

Requires:
2-Channel Radio
6-Cell, 7.2V Battery and Charger

These huge, 1/10-scale, 2WD electric car crushers are all muscle. Their thoroughly-engineered chassis and front and rear bumpers redefined off-road durability. Each has a rugged, 4-wheel independent double-wishbone suspension; four oversized, coil-over friction shocks; fully-enclosed gearbox; and heavy-duty 3-step forward/1-step reverse speed control...ammunition that shot the **Big Brute** to a three-event win at the 1989 NR/CTPA World Championships.

The **Big Boss** features a scale Ford F-250 body with chromed rims, front bumper, and grill, roll bars with lights, detailed V-8 engine, and bold new decals. A clear Toyota body with rollbar and full decals dress up the **Brute** for crushing. Both Lexan bodies take a pounding and still look fresh off the lot. And wait till you see the size of those monster tires! **Ultimate Combos** are available with both monster trucks. Order today and watch the competition run for cover!

Crush 'Em With The Biggest and Baddest!

The 1/10-scale USA-1 electric monster truck has it all. The machine was created in cooperation with the popular full-size USA-1's owner, reproducing the mighty 1990 Chevy Silverado body seen on ESPN and at car-crushing events in the model's highly-detailed durable Lexan scale body, decals, and chrome accents. This 4WD/4-wheel steering masterpiece is also unmatched for power and maneuverability. The 4-wheel independent suspension features new steering arms, upper and lower control arms, and axles. The upper arms have adjustable camber, and the front steering blocks have 10° of caster for perfect handling. Suspension travel is an impressive 1 1/2".

Other standard features include redesigned steering blocks, metal bushings, speed control, eight coil-over shocks, and heavy-duty aluminum shock towers. Replacement tires are already available, as are heavy-duty hop-ups from MaxTrax—see page 60. The USA-1—the zenith of monster truck size, style, and unstoppable performance. Order yours today!

**Even More Savings with
Ultimate Combos!**

Kyosho truck Ultimate Combos all include: model, radio, 6-cell battery, charger, field bag, paint, brush, and 8 "AA" batteries. Big Boss Ultimate Combo also includes striping tape.

MRC MONSTER TRUCKS

Blackfoot

• Choose from 7 popular models.

Clodbuster

The 1/10 scale **Blackfoot** features a realistic, chrome-accented Ford body and rollbar. Based on the Blackfoot chassis, the 1/10 scale **Monster Beetle** scrambles over any terrain with its huge 5.1" diameter tires. Dual motors on the 4WD/4WS **Clodbuster** can be switched to run in parallel for power, or in series for endurance. The 2WD **Mudblaster's** suspension gives it top travel over tough tracks. A ball-bearing-type diff gives the **Nissan King Cab** true racing truck power. The 1/12 scale **Lunch Box** sports a Dodge van body ready for customizing. A '53 Ford F-100 body gives the **Midnight Pumpkin** nostalgic looks. All include body, motor(s), speed control, coil-over springs, tires and wheels. All require a 2-channel radio, charger and 6-cell pack battery.

KYOSHO OUTLAW RAMPAGE TRUCK

1/10 scale stadium truck racing with gas power and speed!

NEW!

• If you think the electric trucks are fast—wait till you blow them away with gas power!

Length: 14.75"
Width: 11.5"
Height: 7.5"

Engine with easy pull-start, fuel tank, and gear box already installed.

Tough aluminum chassis protects engine and radio components.

Longer run times, greater power, hotter speeds...Kyosho's new Outlaw Rampage 2WD gives R/C stadium truck racing a whole new look and sound! The included O.S. .12 CZ-R engine, already mounted to the rugged aluminum chassis and featuring easy recoil starting, provides high RPMs that the heavy-duty gear differential drive turns into blistering speeds.

The Outlaw Rampage features the same independent suspension with adjustable upper arm lengths and the proven racing wheels and tires that made the Outlaw Ultima ROAR Region III Monster Truck Champion. Chassis and wheel dirt guards are also included. Long adjustable,

oil-filled, coil-over shocks on all wheels provide perfect dampening. Fuel tank and glo-starter are also included.

The racing Ford pickup body and colorful new decals recreate the excitement of real stadium racing trucks. Add to the Outlaw Rampage's performance with Kyosho Universal Swing Shafts, ball bearings, adjustable tie rods, and Ultima hop-up parts (see pages 58-63). Only a 2-channel radio is required for nitro-powered stadium racing truck action.

• All feature Hobbico's 5-year limited warranty

Improved Hobbico 900 Series Chargers now feature Hobbico's 5-year limited warranty. All include new high output, low operating temperature transformers for reliable repeat charging, high quality internal components and insulated solder joints that assure efficient, safe charger operation, fuse-protection on AC input for added safety, and reverse-polarity protection for proper DC input.

For basic charging, the Model 900 AC/DC Auto-Charger fully charges 6-cell packs in 15 minutes, and 7-cell packs in about 30 minutes. An attached 5 1/2' AC input cord lets you charge with standard household current. For use with a 12V DC auto battery, a 3' DC input cord with battery clips soldered in place is included. This fuse-protected charger has a variable rate 15-minute timer, trickle charge LED, and attached 2' Kyosho output charge cord. An included adapter allows you to charge most types of batteries.

The Model 905 AC/DC Multi-Charger includes the same features as the Model 900 (less trickle charge) and adds a selectable charge/discharge switch and a precision AMP charge meter. It also provides high output for fast charging of your 6- and 7-cell NiCds.

Hobbico's 910 and 920 models feature a new side-mounted boost switch which gives you an extra boost of power for charging 7-cell packs and a new ventilated case design which allows heat dissipation of the internal components.

The 910 AC/DC Variable Rate Charger augments the fine qualities of the AC/DC Auto-Charger with a current adjust knob that allows you to regulate the charge rate for your specific battery requirements. Also featured are a plug-in voltmeter output for battery voltage monitoring, and a convenient charging rate chart located on the front panel.

The 920 AC/DC Digital Auto-Charger adds digital readout on both current and volts. Whatever your charging need, there is a Hobbico Series 900 Charger for you!

PRO-TECH CHARGERS

Pro-Tech's **707 AC/DC Peak Charger** has a built-in peak detecting circuit and can charge two batteries at the same time. Four LED lights monitor its fast charging progress. The model **707** is also available with an SCR battery. The **706** combines the features of the 700 Digital and 707 Auto-Peak; it can fast charge one battery and top off a second at the same time. The **702 AC/DC**, designed for 6- and 7-cell packs, works off of a 12V DC power source or household AC current. The **701 AC/DC** is even more versatile, with adjustable current handles 4-8 cell battery packs. The **700 AC/DC Digital Charger** includes all of the 701's features plus digital ammeter, voltmeter, alligator clips, an AC plug, and a cigarette lighter plug.

VICTOR Engineering HI-IQ & BATTERY CONDITIONING ACCESSORIES

The easy-to-use HI-IQ's can do everything: grading/matching, charging, discharging, cycling, and more. They feature alpha-numeric digital display, constant display of amps, volts, time, and mAh, a digital keypad for function selection and data entry, plus digital voltmeter probes, motor current test circuit, and auto cycling up to 99 times. **HI-IQ Sr.** has constant current discharge up to 25 amps. Compact, 8-channel **IQ x 8 Multiplexer** features 8 high-current cell holders in a convenient drawer for multiple-cell matching; combined with HI-IQ Sr., it yields a 20A+ discharge rate for faster cycling. With **HI-IQ PC Interface** (sold separately), IQ x 8 can break-in or analyze up to 8 motors at a time, equalize and condition a single pack, or charge/discharge/grade up to 8 packs at a time! Add **IQ Boost 2000** to HI-IQ or HI-IQ Sr. to convert to an incredible 100A discharge rate for testing and conditioning up to 20-cell packs for "surge" capability in drags and pulls! Convert your HI-IQ or AC charger for use with DC power sources with handy **IQ Power-1 AC/DC Power Supply**. Max output, 12A, with 8-15V current.

KYOSHO CHARGERS

Compact and easy to use, Kyosho's low-cost **Multi-Charger II** features fully-adjustable charge and discharge current to handle any 4.8-8.4V, 250-1800 mAh battery. Pushing one button sets time and starts your charge. A bank of LEDs lets you know at a glance how much charge time is left. Includes universal output terminals, electronic timer, Kyosho/Tamiya connectors, and a handy storage compartment for the attached heavy-duty cords. But for a top-of-the-line peak charger, the **F.E.T. Peak Charger** can't be beat. In just 20 minutes, the F.E.T. Peak Charger will peak charge 4-7 cell, 270-1700 mAh packs from a DC power source...and then automatically switch to trickle charge to maintain top power. Convenient design includes one-button operation and a safety cut-off that prevents damage due to incorrect hookup! Cord and clips included; connectors required.

Competition Electronics, Inc.

TURBOCHARGERS, STOCK COP & TURBO 30

DC powered **Turbocharger** cycler/charger/diagnostic lab features ammeter, voltmeter and clock, and offers peak charging of 1 to 7 cells, with a digitally-presettable charge rate of up to 10 amps. It also discharges 1-, 4-, 6-, and 7-cell packs, displays the 10-amp rate. Automatic charge/discharge cycle mode allows single cell matching for pack assembly. **Linear Turbocharger** adds constant current charging rate of up to 10 amps for SCE packs. **Turbo Thirty** 3-stage peak charger offers programmable amp & time rates, non-volatile memory to store and retain settings, and adjustable 1-10A charge rate. Other features include 30A single-cell discharge rate, 25A rate for 6-7 cell packs, built-in fan, and single-cell holder. Low-cost **Stock Cop** "polices" stock races to make sure all motors are legal! Simple, pushbutton use with voltmeter and 6-cell SCR pack (not included).

TEAM ASSOCIATED

REEDY BATTERIES

Associated gives you budget-pleasing flexibility in dealing with the power needs of short races and tight tracks with three different types of 6- and 7-cell, 1400 mAh SCR packs. **Ultra Power** packs use only the top 1% of all cells, matched for capacity and voltage, to put you in the top percentile of power. **Racer** cells are computer-matched and cycled for maximum performance at low cost, while **Team** cells offer greater performance at a very minimal difference in price.

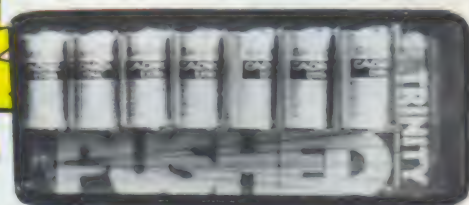

Reedy's 6-cell, 1200 mAh **Power pack** comes assembled with universal connector for sport and fun runs, while the unassembled 6-cell **Team SCE** pack provides the extended run time and high output necessary for top modified finishes. Formerly available only to Team Associated racers, new **World SCE** unassembled packs are high-quality cells double-matched at a 20A discharge rate for voltage and capacity...and only cells rated at 690-720 seconds survive! All (except Power Pack) require connectors.

TRINITY® PUSHED BATTERIES

SAVE
\$13.00
Off 6-Cell SCR

Get the performance edge that Team Trinity drivers — guys like Joel "Magic" Johnson, Tony Neisinger, Bob Light and more — have enjoyed...the Pushed Cell advantage! Cells for Trinity's **Pushed Batteries** are cycled through a computerized charging and conditioning sequence to increase capacity, voltage output, and run time. Each cell is also computer-analyzed and labelled with run-time, average volts, discharge rate, and peak charge rate...and then matched with similar cells for packs of incredible consistency and power! They're available unassembled in 6- and 7-cell 1200 mAh SCR and 1700 mAh SCE packs, or in 6- or 7-cell, 1400 mAh SCE packs. Connectors required.

SANYO® NiCd RECEIVER BATTERY PACKS

12 "AA" NiCds
19.99

Adaptable to any radio system. Sanyo NiCd receiver packs are available in three sizes and are all 4-cell packs rated at 4.8V. The **600 mAh** NiCd pack is for most normalized models. The **800 mAh** NiCd pack is for heavy-duty applications. Use the **1200 mAh** NiCd pack for 1/4 scale models. All come with an 8" lead attached. Just supply your own connector, and you'll have a new receiver battery pack! Individual Sanyo "AA" batteries can be used as receiver batteries for radio systems which call for "AA" dry-cell batteries. You can also use them to assemble packs for electric powered cars, boats, or airplanes.

PEAK ORION BATTERIES PERFORMANCE

Peak Performance brings internationally-known power packs to down-home racing with Team Orion Matched Cells. Formerly available only in Europe, these high-quality Sanyo cells are matched on a custom-built Lavco computer system for maximum consistency and power.

Each cell comes with a computer-printed label that provides discharge time (based on 10A), average volts, total energy, and its own unique I.D. number. Sets are then factory-sealed in boxes to ensure the most consistent power packs ever.

Orion NiCd's are available unassembled, in both 6- and 7-cell 1400 mAh SCR packs for stock racing or 1700 mAh SCE packs for modified racing. Check the listings below for the matched power for your racing needs. Remember: the last three numbers of description indicates estimated run time in seconds!

BATTERIES Super Gold SCE 6C

• Reach new levels of performance power with PTI Super Golds

NEW!

With PTI Super Cells and Super Gold Cells, the only thing that's pushed is the competition! Equivalent to the best pushed cells, Super Cells are "just" top-quality matched and cycled cells that cost less than pushed cells...and last longer, too. Available in assembled 6-cell SCE packs, Super Cells are also available in unassembled, 6- and 7-cell 1400 mAh SCR or 1700 mAh SCE packs with plastic insulator rings, as are Super Gold Cells, which outperform even Super Cells. They also include single-cell shrink wrap and gold bars for fast, easy pack assembly. In addition to Super Cells and Super Gold Cells, PTI also offers: an assembled, 5-cell 50 mAh receiver pack; 700 mAh "AA" cells (perfect for FM/PCM transmitters); and assembled, 1400 mAh SCR or 1700 mAh SCE saddle pack batteries. All unassembled cells require connectors and leads; all assembled packs include leads.

KYOSHO COLOR WHEELS

Kyosho's wild low-profile wheels are available in eye-catching neon yellow, green, and orange. The color is molded in (not simply dyed) to make sure they'll keep their good looks through scores of punishing heats. Priced at just pennies more than normal white wheels, Kyosho Color Wheels are a fun, inexpensive way to add color to your buggy and an easy way to pick your car out of the pack. Available in front and rear styles for many popular buggies, including a special, narrow, front wheel for 4WD cars. See the '91 Tower Catalog page 52.

KYOSHO® Shocks and Shock Oil Set

- Precision dampening.
- Improve your car's handling — at little cost!

Shock Oil Set

Platinum Shocks

Gold Shocks

Gold and Platinum Shocks are oil-filled, coil-over, anodized aluminum shocks designed for precision dampening. Platinum are instantly adjustable by turning the ball end. Quad sealing makes them virtually leakproof, and two spring adjusters are included. Gold are triple-sealed and include three separate sets of pistons for varying the internal dampening. Both require shock oil. Oil, springs, and shock stoppers are not included. All are sold in pairs. Kyosho also offers the **Shock Oil Set** with three weights of color-coded oil.

DURATRAX[®] BBS WHEELS & FOAM TIRES

DuraTrax foam tires are ideal for 1/10 scale on-road racing. These tires are available in three popular compounds to match any track surface. **Yellow** is ideal for carpet and drag racing, offering maximum traction. **Green** is the best all-around compound for asphalt, concrete, carpet, and hard-dirt oval racing. It provides excellent traction and long life. **Blue** survives tough tracks that would eat up softer compounds. **Rubber Slicks** provide excellent on-road traction. Convert your JRX-2 or Kyosho off-roader for exciting road course action with direct-fit rear **On-Road Rims**. With **BBS Wheels** and **BBS Adapters**, you can use any of these tires for your off-road buggy. All tires are sold in pairs. All tires are black; color denotes rubber compound.

Engineered to be the best.

Extensively tested by top national drivers, DuraTrax Tires have become favorites among all racers for their quality and their amazing variety of innovative treads. A perfect blend of natural and synthetic rubber, DuraTrax tires give you the best performance on any of your favorite racing surfaces. All are 100% rubber, with exacting tread and wall tolerances of $\pm .002$ in. to wear evenly over a long period of time so a thin spot won't detour your final dash for the finish line. There are affordably-priced DuraTrax tires for practically any R/C car use. All are sold in pairs.

EAGLE PRODUCTS CAR DECALS

Go wild (not mild!) with these hot-looking new decals from Eagle Products. New "Wave", "Splash", and "Seismic" styles bring the California Sport truck look to town, rendered in multi-colored fluorescent hues. Each decal sheet includes three sizes of graphic, plus striping, so you can express your style. And, because these great graphics have adhesive fronts, you can mount them inside the body...and protect the look that gets the looks!

Gas Cars

KYOSHO® When you're ready for more
R/C excitement—Go Gas!

BURNS™ DX & TURBO BURNS 4WD™
High-performing, .20 size off-rovers!

Turbo Burns finishes 1st, 2nd, and 3rd at the European Championships!

Burns DX has the same chassis layout as the original Burns.

Incredible speeds, realistic sounds, and the sharp smell of burned nitro are just three reasons why 1/8 gas racing is growing like wildfire. For many new fans, there's no better way to race — and there's no better way to break in than with the affordable, 1/8 scale **Burns DX 4WD**. The Burns DX features a shaft-drive system adapted for 4-wheel drive and three gear-type differential units. Its flat-pan, durable aluminum chassis glides over obstacles. Low-profile pin spike tires, mounted on lightweight one-piece wheels, enhance handling in the dirt and around corners.

The Burns DX's sophisticated suspension features special formula nylon double wishbones for maximum wheel travel on even the toughest surfaces. Kyosho oil-filled shocks on all four wheels minimize the effects of bumps and hazards. High-quality bronze bushings smooth out the ride

Both cars:
Length: 16.5"
Width: 11.8"
Weight: 7.1 lbs.

Both Require:
2-Channel Radio
.21 Size Buggy Engine
(O.S. .21 EX-B or
.21 RF-II recommended!)

while increasing the affordability of this racer. The Burns DX comes with a clear Lexan racing body, disc brake, custom muffler, and manifold.

Serious gas racers looking for a machine prepared for all-out competition can choose the **Turbo Burns**. It's outfitted with a new, heavy-duty suspension, large volume shocks, and complete ball bearings for superb handling and smooth operation at blistering speeds. Also included are a new body and wing.

For the hottest R/C racing around, go with the flow — go gas, with the 1/8 scale Burns!

Engine: O.S..12 CZ-R (included)

• A sleek design for off-road enthusiasts.

Experience the speed and excitement of gas power with **Kyosho's Rampage**. Based on proven Ultima design, this 13.8" off-roader offers novice drivers top 2WD gas power with convenience that rivals electric cars! With its recoil starter and special large-throat carb, the included O.S..12 CZ-R engine provides fast, sure starts, and the power needed to get out in front, and stay there.

The Rampage features a duraluminum chassis and an enclosed gearbox designed to keep out rocks and dirt, while low-profile pin-spikes, oil-filled shocks, and a 4-wheel independent suspension keep you in control. Fuel tank, muffler, body, and glow plug driver are included. Add a 2-channel radio (now available at combo savings!), fuel, and 4 "D" cell batteries, and you're ready to race — with Rampage!

• Highly sophisticated 4WD
— 10-size gas-powered buggy.

• Leave electrics in your dust!

Experience the excitement of gas-powered 4WD off-road racing with the 1/10 scale **Stinger MK II**. Front and rear differential gears and a cogged belt drive system are combined for incredibly efficient power delivery to all four low-profile pin spike tires. A mid-engine layout provides excellent balance and the Stinger MK II's classic 4-wheel independent double-wishbone suspension yields plenty of wheel travel. Kyosho oil-filled shocks also lessen the effects of off-road hazards. Measuring 14.6" in length, the Stinger MK II comes with a clear Lexan body, muffler, and zip pull starter. An .09-.12 car engine (O.S. CZ-2 recommended) and a 2-channel radio are required. Save with the Combo!

KYOSHO MOTORCYCLES

- Authentic looks and realistic racing action!
- Crash bar aids in stumbles and helps to keep cycles upright.

Kyosho has achieved the highest standards of true bike performance in their 1/8 scale models. The Honda NSR 500 and Yamaha YZR500 R/C cycles feature chain drive and working suspension systems, Kyosho's gyro steering design, weighted front wheels, a crash bar—which aids bike if it stumbles and helps it to remain upright with gradual throttle—and a LeMans DM20 motor. Both also feature an ABS monocoque frame, shocks and slick tires. The Paint Sets include brush and masking tape. Bearing Sets, Front and Rear Oil Shocks, and LeMans DM20BB motor with

ball bearings are also available. Required are Kyosho's Impulse II radio with RS-M on-board set, a 6-cell 270 mAh battery, and charger. The Ultimate Combo includes kit, Impulse radio with RS-M set, field bag, quick charger, 270 mAh battery, paint set, and 8 "AA" batteries.

FA Honda Racer

FA Honda Racer 1/7 Scale Cycle

Kyosho's FA Series 1/7 Scale Honda NSR 500 comes fully assembled and ready to race—it makes a great gift for cycle fans of all ages!

Operating features are identical to the 1/8 scale motorcycles above, and its looks are equally lean and authentic. A competition-quality, 2-channel, digitally proportional radio is included for great fun straight from the box.

TC1698 FA Honda Racer 1/7 Scale Cycle . . . 139.95 **\$109.99**

KYOSHO® Start your off-road career with the World Champion designs of Ultima II

For the beginning off-road enthusiast to the serious competitor, Kyosho's Ultima series is the place to look for the performance of the 1990s. These rugged machines are built to conquer...whatever your skill level, Ultima will make you a champion!

Turbo Ultima II: Loaded and ready to win at the track.

If you're ready for a buggy that comes pre-tweaked for serious competition, try the affordable **Turbo Ultima II**. It's a 2WD terror that comes loaded with over \$220.00 retail in performance-matched hop-ups. On any other comparably priced buggy, these hop-ups would be options; with the Turbo Ultima II, they're all standard—and all ready to put you out in front.

Ultima II: Affordable high-performance buggy racing!

Off-road enthusiasts looking for the next generation of Ultima performance, take note: the **Ultima II** has arrived. The lightweight, space-age Kelron™ chassis is extra durable and protective, and accepts either stick or saddle pack batteries. Fine-tune your buggy for better performance with the adjustable front and rear suspension links. Oil-filled, coil-over shocks, duraluminum shock towers, a LeMans Stock 05 motor, and heavy-duty rotary speed control are also included. The Ultima II accepts most original Ultima hop-up parts on the market. Start your off-road career at the top with proven Ultima performance that's now hotter than ever!

Ultima Pro XL: Pre-tweaked with the professionals' choice of hop-ups!

Advanced racers enter the 1990s at No. 1 with the **Ultima Pro XL**. A longer wheelbase graphite chassis with 30 degree caster and wider front end improve handling and stability, even at top speed. Long rear suspension arms allow for a smoother ride. Gold shocks, front and rear anti-roll bars, and rear dogbones are also featured. The rear "A" arms feature a unique, adjustable rear toe-in linkage, and the upper suspension turnbuckles offer instantly adjustable front and rear camber.

All three buggies come with a racing body with adjustable wing mount, plus fluorescent wheels and racing tires. Experience turn-of-the-century performance today. The next Ultima generation has arrived.

TURBO ULTIMA II™

Loaded with all these hop-ups — over \$220.00 retail value!

- Fully adjustable front and rear tie-rods
- Fiberglass shock towers
- Ball differential
- Kyosho Gold Shocks
- Ball bearings

TEAM LOSI PERFORMANCE

JRX-PRO & JUNIOR TWO 2WD

The new **Junior Two** looks like a million, yet won't bust your budget. It's built on a long 30" kick-up composite resin chassis for super stability and max cornering ability. A wide-track front end features rack-type steering for great ground clearance without control or stability loss, plus oil-filled coilovers. The H-arm rear suspension absorbs jolts like pro models. Ball bearings, pinion, real rubber off-road tires, and lightweight wheels turn power from the LRM (low rotating mass) tranny into impressive speed and traction. And when you're ready to go pro, Team Losi's got you covered, with the **JRX-Pro** — a graphite-chassis racer that offers all the Junior Two's features (except pinion), plus extra long rear shocks, pro rear shock tower, and extra long camber links. Both require all electrics and a 2-channel radio; JRX-Pro also requires servo saver and pinion.

Stock #	Description	Retail	Now
TC1701	JRX-Pro 1/10 Off Road Kit	\$309.95	\$169.99

TEAM ASSOCIATED RC10 GRAPHITE AND CHAMPIONSHIP BUGGIES

• Super Low, Low
RC10 Prices!

RC10 w/Body

The **RC10 Championship** Series gives you Associated's proven aluminum chassis and latest buggy improvements. Wider front A-arms and in-line steering provide greater stability and improved steering control. New, two-position shock towers, rear bulkhead and 1 1/2" rear hub carriers provide extra adaptability in "dialing-in" to track conditions. All RC10 Champs come with mechanical speed control and racing body (except **Basic Kit**). The **RC10 Graphite** kit, available with or without bearings, includes special-weave graphite chassis, universal swingshafts, and Protech body; an electronic speed control is recommended, and a motor is required. All RC10s require 2-channel radio, battery (except **RC10 Champ. with Battery and Body**), and charger.

KYOSHO LAZER ZX™

• Packed with the latest technology for outstanding 4WD racing

Length: 14.1"
Width: 9.4"
Weight: 56.4 oz.

Top qualifier
— ROAR Natl
Top qualifier
and Winner
— NARCA Natl

Kyosho's hot 1/10 scale 4WD Lazer ZX electric buggy is racking up the wins — and no wonder! The drive system is built around a 3mm, low-friction twin belt drive, with a center-drive torque limiter for varying front-to-rear drive bias to track conditions. Front and rear gear diffs (with one-way bearings in front), ball bearings, and heavy-duty front swingshafts are protected by a flex-resistant double-deck graphite chassis that also keeps weight low.

Lazer's improved double-wishbone suspension arms and Kyosho Gold Shocks offer impressive cornering and stability, backed by low-profile, pin-spike tires. All-wheel camber adjustment, a sleek new body with undertray, wing plus adjustable mount are also included.

The Lazer ZX rolling chassis requires all electrics, a 2-channel radio, and an electronic speed control.

OFF LAST
TOWER TALK!

Slingshot shown with Andy's Corvette Outlaw body (available separately).

Make your trips to the oval winning ones with the advanced design — and exceptionally low price — of the 1/10 scale Slingshot 4WD.

Featuring a twin-belt drive system and full ball bearings, the 16.1" long Slingshot loads a 7-cell battery on the left side of the main chassis — providing ideal weight distribution for oval racing. Batteries can also be loaded in the usual manner.

Slingshot features a 2.5mm thick FRP main chassis with 1.5mm upper deck, 4-wheel independent double wishbone suspension, Kyosho Gold Shocks on all four wheels, narrow front and low profile rear tires. Required are a 240-size motor, 2-channel radio, electronic speed control, 6 or 7-cell battery, body, charger, and body.

KYOSHO OPTIMA MID®

Only
\$199.99

Kyosho's Optima Mid

1/10-scale 4WD combines belt-drive efficiency with a mid-mounted LeMans 240ST motor (included) for incredibly smooth power delivery and balanced handling. Kyosho Gold Shocks and extra-long wishbones on the Mid's 4-wheel independent suspension provide smooth, precise handling, even on the toughest tracks. Other features include an aluminum pan chassis, four ball bearings, Kyosho's Heavy-Duty Rotary Speed Control, plus low-profile tires, Lexan body, and an adjustable rear wing. The 13.8" long Mid requires a BEC-equipped, 2-channel radio, 6- or 7-cell battery, and charger, available now in a money-saving combo!

KYOSHO CORVETTE ZR-1

Enjoy the high-powered performance of the lean, low-slung Kyosho Corvette ZR-1 in gas-powered or new electric-powered versions!

The ZR-1 Electric is powered by a potent 19,000 RPM LeMans Stock 05 Motor, and includes Kyosho's smooth rotary speed control. The Kelron™ double-deck chassis is based on the classic Ultima design, and accepts most Ultima hop-ups for even greater performance.

The ZR-1 Gas slices through the air with the power of the included O.S. .12 CZ-R engine, mid-mounted on a 2.0mm thick duraluminum flat-pan chassis for optimum balance. The ZR-1 features an easy-to-use recoil starter, silencer muffler, and quick-fill fuel tank. Both versions feature an enclosed gearbox, fully-independent, double-wishbone suspension, and four oil-filled pressure shocks for a ride that's as smooth as the lines on the Lexan body. Both require a 2-channel radio; electric version also requires 6- or 7-cell battery pack and charger.

KYOSHO®

RAIDERS™

Raider named best beginner's car 2 years straight by RC Car Action!

The front suspension can really take a wrenching... and return to its original shape.

TURBO RAIDER™

Length: 15.4"
Width: 9.8"
Height: 5.5"
Weight: 51.1 oz.

Requires:
2-Channel Radio,
6-Cell Battery, & Charger

Includes these hop-ups:
Outlaw Stock Motor, Oil
Filled Shocks, Gear Diff,
Ball Bearings, and ROAR
Block Tires!

Only
109⁹⁹

An upgraded version of the original Raider, the **Turbo Raider** includes Kyosho's Outlaw Stock Mega Motor, a 22-turn powerhouse reaching 22,000 RPM, competition oil-filled shocks, a gear differential with two ball bearings, heavy-duty rotary speed control, orange wheels, and new rear block-pattern tires. The 15.4" Turbo Raider comes with a clear Lexan body and wild neon orange decals that warn the competition to steer clear or get lapped!

Required for operation are a 2-channel radio, 6-cell battery, and

charger. Save on all required items with the Performance Combo.

Stock #	Description	Retail	Now

TC2768	6-Cell Power Battery Pack	24.95	17.99

The **Kyosho Raider ARR 1/10-scale 2WD** comes complete with proven Raider power, handling, and value. This ultra-durable kit includes all of the Raider's great design features plus jammin' decals and neon green wheels for rad new looks. Best of all, the Raider ARR comes factory-assembled and pre-painted. Install the rods and radio equipment, apply the decals, and you're ready for 2WD action!

Hop-ups are easy, too, so you can make your Raider the hottest running and hottest looking buggy they've ever seen. Requires a 6-cell battery, charger, and 2-channel radio.

KYOSHO® Scale reproductions of the world's finest cars.

Showroom performance and style!

The Kyosho Scale Series combines incredible detailing with pulse-pounding power. Each car is precisely scaled to recreate the classic lines of the full-size cars. But there's more to these 1/10 scale 2WD electric street cars than eye-popping, display-quality accuracy.

The new **Ferrari F40** and popular **Porsche 911**, **Nissan 300ZX**, **Ferrari Testarossa**, **Corvette ZR-1** (see page 71), and **Lamborghini Countach** are based on the Ultima's proven, classic engineering design, giving these cars top performance to match their exciting looks. All feature a strong, lightweight Kelron™ composite double-deck chassis which can be converted into a 2WD off-road buggy or even a racing truck. They accept either stick or saddle pack batteries, and include an independent suspension system with oil-filled, coil-over shocks.

Strong, versatile Kelron™ chassis

A powerful, rear mounted LeMans Stock 05 motor and heavy-duty rotary speed control are included. The enclosed gearbox and differential offer protection for consistently smooth operation. A full-width bumper defends against on-road obstacles. Specially-molded Lexan bodies, wide radial pattern tires, and scale wheels are perfect in all the details.

Scale Series street cars require only a 2-channel radio, 6-cell battery, and charger. But while you're at it, grab the **Ultimate Car Completer Combo**: you get the kit and required items, plus paint, brush and 8 "AA" batteries at great savings!

Bring world-class racing excitement home with Kyosho's Scale series racers!

Kyosho Scale Series 2WD race cars offer realism that's straight off the track. Each one recreates in 1/10 scale the clean, aerodynamic lines of the full-size speed machines—and is equally impressive on display or on-road.

In addition to a strong, lightweight double deck chassis, Scale Series racers feature differentials, double wishbone suspension systems and inboard shocks modeled after modern race cars. Also included are a Kyosho Outlaw Stock Mega motor and heavy-duty rotary speed control. The scale Lexan bodies, each a masterpiece of authenticity, can be quickly removed for fast battery pack changes courtesy of a quick-release body latch system. The new

Kenwood Porsche captures high-speed IMSA and Group C action. Pair it with the Scale Series **Toyota R89C** and **Nissan R89C**, and you can live the excitement of authentic World Championship Group C racing! Even the full-size car's unique diffuser is reproduced on the **McLaren Honda F-1**. The **Penske PC-19** is a licensed replica of the popular Indy race car, while the **Ferrari F-1** recreates the mystique of the real Grand Prix car.

Durable chassis with true scale suspension

All require a 2-channel radio, 6-cell battery and charger. Get all required items, plus paint, brush and, eight "AA" batteries at great savings, with the **Ultimate Car Completer Combo**.

ONLY TOWER HOBBIES

OFFERS YOU SO MANY R/C PRODUCTS AT THE LOWEST PRICES ANYWHERE!

Here are just a few examples of Tower's low, low pricing!

DURATRAX COMPETITION SHOCKS

Smoother handling and performance have never been more affordable! 3" and 4", gold-anodized DuraTrax shocks fit most popular cars and monster trucks. Ball end and leak-preventing silicone O-ring are included; all you do is add oil. See page 59.

AIRTRONICS VG4R 4-CHANNEL PCM RADIO

Step up to PCM-quality control with Airtronics' full-featured VG4R 4-channel system. A dual-conversion receiver heads up a package that also includes servo reversing, NiCds, charger, adjustable sticks, and three # 102 servos. More on page 31.

KYOSHO TURBO ULTIMA II

The 14.2"-long Turbo Ultima II 2WD comes pre-tweaked for 1/10 scale wins, with ball bearings, Kyosho Gold Shocks, ball diff, fully-adjustable front and rear tie-rods, and a 22 x 1 Mega Outlaw stock powerplant for unrivaled power. See page 67 for more.

TOP FLITE MONOKOTE® COVERING

For a mirror-smooth, drum-tight finish, use Top Flite MonoKote. Its totally-dry adhesive is activated by the heat from your iron or heat gun. Only \$7.99 per roll. See page 37.
